

Cumulative Final Cram Sheet

EAM310 · Full Cumulative · Weeks 1–9

TCM for Ballroom Dancers

reMarkable Edition

Prof. Daniel Schrier, D.O.M., L.Ac. | Final: Friday, Sept. 11, 2026
Night-Before Recall + Quick Reference · Highest-yield facts only

1 • Week 1 — Vital Substances

Substance	Key Facts
Jīng 精	Pre-Heaven (fixed, from parents, stored in Kidney) + Post-Heaven (replenished by food/Spleen-Stomach) = Kidney Essence. Governs growth/reproduction (7-yr ♀ / 8-yr ♂ cycles), produces Marrow→Brain, basis of constitution.
Qì 氣	Formation: Air (Qīng Qì) + Food (Gǔ Qì) → Zōng Qì (chest, Heart/Lung) → Zhēn Qì → splits into Yíng Qì (nutritive, inside vessels) + Wèi Qì (defensive, outside vessels, 50 circuits/day). 6 functions: Transporting, Warming, Protecting, Holding, Transforming, Rising.
Qì Patterns	Deficiency (fatigue, weak voice, Empty pulse) · Sinking (organ prolapse, SP) · Stagnation (distension > pain, Wiry pulse, LR) · Rebellious (wrong-direction Qi: ST ↑ =nausea, LU ↑ =cough, SP ↓ =diarrhea).
Xuè 血	Most Yin substance; Spleen=source, Heart=transforms, Kidney=via Marrow. Functions: nourish, circulate w/ Ying Qi, moisten, house Shen, menstruation. Patterns: Deficiency (pale, Choppy/Fine pulse) · Stasis (stabbing fixed pain, purple tongue, Wiry/Choppy pulse) · Heat in Blood (Red tongue, Rapid pulse) · Loss of Blood.
Qì Stag vs Blood Stasis	Qi Stag = more distension than pain, moving, normal/slightly red tongue, Wiry pulse. Blood Stasis = more pain than distension, fixed/stabbing, purple tongue, Wiry/Firm/Choppy pulse.
Jīn Yè 津液	Jīn (Yang: clear, watery, Exterior, fast, Lung) vs Yè (Yin: turbid, dense, Interior, slow, Spleen/Kidney). Fluid Deficiency = dryness.

Quick Recall: Jing=foundation/constitution · Qi=movement/warmth · Blood=nourish/anchor Shen · Fluids=moisten.

2 • Week 2 — Eight Principles 八纲

Pair	Key Differentiator
Ext/Int 表里	Exterior = fever + aversion to cold SIMULTANEOUSLY + Floating pulse. Lose the pairing → moved Interior (Deep pulse).
Def/Exc 虚实	Pressure response is the key: Deficiency = pain RELIEVED by pressure/warmth. Excess = pain AGGRAVATED by pressure.
Cold/Heat 寒热	Full Heat = whole face red, thick yellow coat, Rapid Full pulse. Empty Heat = malar flush only, no/peeled coat, Rapid Empty/Thin pulse (Yin deficiency).
Yin/Yang 阴阳	Master pair. Yin = Interior+Cold+Deficiency (slow, quiet). Yang = Exterior+Heat+Excess (fast, loud, active).

Heads up: 8 Principles come first because every other diagnostic system (Zang-Fu, Qi/Blood, Six Meridians, Four Levels, Five Elements) builds on them — get Excess/Deficiency wrong and you tonify an Excess pattern, trapping the pathogen.

3 • Week 3 — Pulse Diagnosis (Nan Jing 18)

Position	Organs
L Cùn / R Cùn	Heart/Small Intestine Lung/Large Intestine
L Guān / R Guān	Liver/Gallbladder Spleen/Stomach
L Chǐ / R Chǐ	Kidney/Bladder Pericardium/San Jiao (linked to Kidney only via Ming Men)
Concept	Detail
Normal pulse	胃神根 — Wèi (flowing/gentle) + Shén (strong/rhythmic) + Gēn (rooted, deep at Chǐ). 4–5 beats/breath, 60–90bpm.
Seasonal pulses	Spring=Wiry · Summer=Flooding · Autumn=Hair-like · Winter=Stone. Abnormal only when accompanied by symptoms (e.g., Flooding in Winter = warning sign).
Floating trap	NOT always Exterior — also Yin Deficiency (Floating+Thin+Rapid, night sweats, five-palm heat). True Exterior floating has simultaneous aversion to cold + fever.
Huǎn 緩	The one qualitatively HEALTHY, non-28 entry — 4 beats/breath, easy to misread as Slow.
Irregular rhythm	Knotted 結 (Slow+random stops=Cold/Heart-Yang def) · Hasty 促 (Rapid+random stops=Severe Heat/Heart-Fire) · Intermittent 代 (regular-interval pauses=most serious, organ/Heart problem).

Quick Recall: Floating+Tight=Wind-Cold · Deep+Rapid=Int Heat · Rapid+Wiry=Liver Fire · Slow+Weak=Yang Deficiency.

4 • Week 4 — Tongue Diagnosis

Aspect	Reflects
Body color	Blood/Nutritive Qi, Heat/Cold, Yin/Yang of Yin organs
Body shape	State of Blood/Nutritive Qi, moisture
Coating	State of Yang organs, Heat/Cold, Fullness/Deficiency
Moisture	State of Body Fluids

Body Color	Indication
Pale	Yang or Blood Deficiency (swollen+wet=Yang def; thin+dry=Blood def)
Red	Heat — with coating=Full Heat; without coating=Empty Heat. Red tip=Heart Fire/Empty-Heat.
Purple	Always indicates Blood stasis. Reddish-purple=stasis from Heat; Bluish-purple=stasis from Cold.
Blue	Same category as Bluish-Purple — Interior Cold with Blood stasis

Quick Recall: Coat reflects Wei Qi · Body reflects Ying Qi · Sublingual veins reflect Yuan Qi.

5 · Week 6 — Diagnosis by Observation (望診)

Category	Key Points
Shen (Vitality)	Having Shen=bright complexion, alert eyes, clear speech. Loss of Shen=dim, dull, delirious. False Shen=sudden brightening in a critical patient — warning sign, NOT recovery.
Face map (Su Wen 32)	Patient's L cheek=Liver · Forehead=Heart · Nose=Spleen · Patient's R cheek=Lung · Chin=Kidney. Mirrored when facing the patient.
5 Colors	Red=Heat · Pale/White=Cold, Blood/Yang def · Yellow=Deficiency/Damp · Blue-Green=Cold/Pain/Stagnation · Dark Grey/Black=Kidney def, Blood stasis.
Body shape	Overweight+depression=Qi def+phlegm-damp · Thin+dry skin=Blood insufficiency · Overall thin=Yin def · Overall overweight=Yang def w/ phlegm.
Five Wheels (eyes)	Inner/outer canthus=Heart(Blood) · Sclera=Lung(Qi) · Iris=Liver(Wind) · Pupil=Kidney(Water) · Eyelids=Spleen/Stomach(Flesh).

Quick Recall: Zang-Xiang = what's inside shows on the outside. Lustrous complexion=good prognosis; dark/haggard=poor.

6 · Week 7 — Diagnosis by Inquiry (問診)

Topic	Key Points
16 Questions	Schrier's 16 (expands Maciocia's 10): Pain, Food/Taste, Stools/Urine, Thirst/Drink, Energy, Head/Face/Body, Chest/Abdomen, Limbs, Sleep, Sweating, Ears/Eyes, Cold/Heat/Fever, Emotional, Sexual, Women's, Children's. Golden Rule: every question should confirm/exclude a pattern — never recite by rote.
Pain: Full vs Empty	Full = aggravated by food/BM/pressure, relieved by rest, sharp, worse w/ movement. Empty = alleviated by food/BM/rest/pressure, dull, better w/ movement.
Pain character	Distending/moving=Qi stagnation · boring/stabbing fixed=Blood stasis · cramping+cold=Cold · burning+fullness=Heat.
Bi Syndrome (5)	Wandering=Wind · Painful=Cold · Fixed=Damp · Heat=Heat (sudden swelling/redness) · Bone=chronic progression of the other four.
Taste map	Bitter=Liver/Heart Heat · Sweet=SP def or Damp-Heat · Sour=food retention/LR invading ST · Salty=KD-Yin def · Pungent=LU-Heat.
Thirst	Cold drinks desired=Heat · Warm drinks desired=Cold · No thirst=Cold · Thirst but no desire to drink=Damp-Heat or Yin def.
Insomnia types	Can't fall/stay asleep=Blood def not anchoring Shen/Hun (Empty). Restless+dreaming=pathogens agitating Shen/Hun (Full). Wake many times=Yin def w/ Empty Heat. Wake early=GB deficiency.
Headache location	Nape=Tai Yang (Ext Wind-Cold/KD def) · Forehead=Yang Ming (ST-Heat/Blood def) · Temples=Shao Yang (Ext Wind/LR-GB Fire) · Vertex=Jue Yin (LR-Blood def).

Not tested: Categories of Dreams / Neijing dream chapters (Su Wen 17, 80; Ling Shu 43) are explicitly marked not tested.

7 · Week 8 — Diagnosis by Palpation (切診, non-pulse)

Topic	Key Points
3 Techniques	Palpation (tracing, hands/feet→elbows/knees) · Pressing (thumb/fingertip, 3x increasing pressure) · Feeling (temp/moisture/texture).
Pressing logic	Tenderness/pain=Excess · more pain=accumulated Xie Qi · weak/soft ± tenderness=Qi stagnation · slippery/hard=Phlegm.
Skin temp	Cold=Cold pattern. Hot on 1st touch, cools w/ pressure=Ext Wind-Heat. Hot on medium pressure=Int Heat (MB/Heart). Hot on heavy pressure near bone=Empty-Heat from Yin def.
Dorsal vs Palm hot	Hot dorsal (back of hand)=Full Heat. Hot palm=Empty Heat. (Ling Shu 74)
Xu Li (apical beat)	Clear/slow=normal · feeble=Zong Qi def · strong/hard=Excess Lung/Heart · large-but-empty=Heart-Qi def · stop-start=poor prognosis.
Nan Jing 5-Phase abdominal map	Above navel (Ren 12-15)=Heart/Fire · At navel=Spleen/Earth · Below navel=Kidney/Water · R side under ribs=Lung/Metal · L side under ribs=Liver/Wood.
Normal abdomen	Solid-not-hard, resilient-not-tight, elastic-not-soft. Hard+pain worse w/ pressure=Full. Too-soft+ache relieved=Empty. Fixed masses=Blood stasis.

Quick Recall: Front-Mu = front/Yin surface, sensitive when Qi accumulates. Back-Shu = on Bladder channel, level with the organ.

8 · Week 9 — Diagnosis by Hearing & Smelling (聞診)

Topic	Key Points
Framework	Hearing (voice, breathing, cough, vomiting, hiccup, borborygmi, sighing, belching) + Smelling (body odor + odor of secretions: breath, sweat, sputum, urine/stool, vaginal discharge, gas). 2nd of Four Pillars (望聞問切).
Voice & Zang-Fu	Lung=production of sound · Kidney=volume of the voice · Spleen/Stomach=strength of the voice.
Voice patterns	Loud=Full/Heat · Weak=Empty/Cold · Reluctance to talk=Cold or LU-Qi def · Sudden loss of voice=Wind-Heat invasion · Gradual loss=LU-Qi/Yin deficiency.
Breathing	Coarse/loud=Full · Weak/thin=Empty · Deep breathing=excess Qi in HT/LU · Weak breathing=deficiency in LR/KD.
Cough/Vomiting/Belching	Loud/forceful=Full pattern. Weak/quiet=Empty pattern. (Same Full/Empty logic across all reflexive sounds.)
Five Element sounds	Shouting=Wood · Laughing=Fire · Singing=Earth · Weeping=Metal · Groaning=Water.
Five odors	Rancid/sour, Scorched, Fragrant, Rotten, Putrid — each tied to a disharmony pattern (not yet explicitly paired to Zang-Fu in source slides).
Odor: general rule	Strong/foul=Heat or Excess. Fishy or odorless=Cold or Deficient.

Flag: the "Scorched" odor slide uses 笑 (xiào) where the classical character is 焦 (jiāo) — confirm with Prof. Schrier before the final. Five Named Odors are not explicitly paired to Zang-Fu organs in the source slides.
