

Quiz Pack

65 Questions + 4 Matching Sets · True/False · Multiple Choice · Fill-in-Blank · Matching · Active Recall · Full Answer Key

Week 9 · Inquiry Continued (Limbs–Children) & Diagnosis by Hearing & Smelling — 聞診 · Lecture 9 (Final Lecture)

Print Edition

Source note: Built from Prof. Schrier's Week 9 lecture transcript, cross-checked against the Inquiry slide deck (661–730) and the Hearing & Smelling slide deck (731–781).

How to use this pack: Take the parts in order — built easy → hard on purpose. Close every source before starting. This is your last quiz pack before the Final.

Target scores: Part A: 90%+ (if lower, the base isn't set) · Part B/C: 85%+ · Part D/E: 80%+ · 80%+ overall means genuinely ready.

PART A · Active Recall — Write From Memory

Heads Up — Cover all sources. Write your answer on the line before checking the key.

1. What differentiates tingling vs. numbness in limb weakness, per pattern?

2. What is the significance of cold fingertips specifically (vs. generally cold hands)?

3. What organs must be sufficiently supplied with Blood for the Mind/Shen and Ethereal Soul/Hun to be anchored for sleep?

4. Contrast difficulty FALLING asleep vs. excessive DREAMING vs. WAKING repeatedly at night — which organ/mechanism does each point toward?

5. Why is dream-symbolism material (the Nèijīng passages) excluded from testable material this week?

6. What does sweating on the palms, soles, and chest indicate, and what is this presentation called?

7. Daytime sweating vs. night sweating — what does each indicate?

8. Sudden vs. gradual onset of tinnitus — what pattern type does each indicate?

9. What determines the intensity of a "fever," according to Prof. Schrier's slides?

10. What is the difference between "aversion to cold" and "fever" in terms of subjective vs. objective?

11. Why does the tongue often show a red tip in emotional distress regardless of which organ/emotion is primary?

12. Name three different root patterns that can underlie insomnia with palpitations.

13. What TCM pattern corresponds to the Western description of a "heart attack," and what are its key signs?

14. Why do younger men with premature ejaculation more often get treated via the Heart, while older men get treated via the Kidneys?

15. What differentiates menstrual pain that occurs BEFORE the period from pain that occurs AFTER the period?

16. What is the 3-month cutoff used for in Inquiry about pregnancy, and what pattern applies on each side of it?

17. Why is chronic earache in a child attributed to the Gall Bladder channel rather than the Kidney?

18. What are the two components of 聞診 (Wén Zhén)?

19. Which three organs govern the voice, and what aspect does each govern?

20. What is the shared root mechanism of vomiting, belching, and hiccup?

21. List the Five Element Sounds and their elements.

22. Name the Six Healing Sounds and their target organs.

23. What is the general rule linking smell strength/quality to Heat vs. Cold?

24. What copy/paste-style error appears on the "Scorched" odor slide?

25. What sound does Hū 呼 refer to in two different contexts across the whole deck?

PART B • True / False

Heads Up — Mark each statement T or F. About a third are deliberately false — including a few classic trap statements.

#	Statement	Answer
1.	Numbness that is unilateral is usually caused by Wind or Wind-Phlegm.	T / F
2.	Tremors always indicate Liver-Wind, but the Wind can be either excess or deficiency type.	T / F
3.	Cold feet in women specifically is attributed to Liver-Blood deficiency.	T / F
4.	Difficulty falling asleep is most often attributed to the Liver, not the Heart.	T / F
5.	Dream-symbolism material from the Nèijīng is explicitly marked as tested material this week.	T / F
6.	Oily sweat on the forehead, like pearls and not flowing, indicates Collapse of Yang and can signal imminent death.	T / F
7.	Daytime sweating indicates Yin deficiency.	T / F
8.	Tinnitus that is aggravated by pressing on the ear indicates an Empty condition.	T / F
9.	Low-pitched tinnitus like rushing water indicates Kidney deficiency.	T / F
10.	The intensity of a "fever" depends on whether the pathogen is Wind-Cold or Wind-Heat.	T / F
11.	A constant low-grade temperature that doesn't fully resolve with sweating suggests Damp-Heat.	T / F
12.	Only the Heart is capable of "knowing" what an emotion is; other organs are affected by emotion without being conscious of it.	T / F
13.	Severe anxiety with stabbing chest pain radiating to the inner left arm and a purple tongue corresponds to Heart-Blood stasis.	T / F
14.	Worry that increases after the menstrual period in women points to Liver-Blood deficiency.	T / F
15.	Sexual-symptom patterns (lack of libido, excessive desire) are fundamentally different mechanisms for men vs. women.	T / F
16.	Premature ejaculation in older men is more often treated via the Heart than the Kidneys.	T / F
17.	Purple or blackish menstrual blood with clots indicates stasis of Blood or Cold.	T / F
18.	Pain that occurs BEFORE the menstrual period generally indicates a deficiency pattern.	T / F
19.	Miscarriage occurring after 3 months of pregnancy is attributed to Liver-Blood stasis or sinking of Spleen-Qi.	T / F
20.	Chronic earache in children is attributed to Damp-Heat in the Gall Bladder channel.	T / F
21.	Kidney governs the production of the voice.	T / F
22.	A weak, thin breathing sound indicates a Full pattern.	T / F
23.	Hoarseness that is chronic and worse in the evening points to Blood stagnation.	T / F
24.	The Weeping voice sound is paired with the Metal element.	T / F
25.	The general smell rule states that a strong or foul odor indicates Cold.	T / F
26.	The Five (named) Odor slides explicitly pair each odor with a Zang-Fu element.	T / F
27.	Odorless urinary incontinence indicates Kidney Yin deficiency.	T / F
28.	Sneezing due to external stimulation (e.g. dust, pepper) is considered a normal reaction, not a pattern.	T / F

PART C · Multiple Choice

Heads Up — Standard 4-option format. Distractors are drawn from real adjacent content — read all four before picking.

1. Feeling of heaviness and/or swelling in the limbs points to:
 - A. Blood deficiency
 - B. Wind or Wind-Phlegm
 - C. Dampness
 - D. Qi or Blood stagnation
2. Atrophy/Flaccidity in its beginning stages is due to:
 - A. Liver and Kidney Yin deficiency
 - B. Stomach and Spleen-Qi deficiency
 - C. Spleen and Kidney Yang deficiency
 - D. Liver-Wind, excess type
3. Which of the following is NOT one of the listed causes of "not being able to fall or stay asleep" (Empty Condition)?
 - A. Deficiency of Blood not anchoring the Mind/Shen
 - B. Deficiency of Blood not anchoring the Ethereal Soul/Hun
 - C. Retention of food
 - D. Excess Liver-Fire agitating the Mind (a Full condition)
4. Sweating that occurs only on the arms and legs indicates:
 - A. Lung-Qi deficiency
 - B. Stomach and Spleen deficiency
 - C. Kidney-Yang deficiency
 - D. Collapse of Yang
5. A high-pitched tinnitus like a whistle or cicada points to:
 - A. Kidney deficiency
 - B. Liver-Yang, Liver-Fire, or Liver-Wind
 - C. Spleen-Qi deficiency
 - D. Lung-Qi deficiency
6. According to the slides, what determines the intensity of a "fever" in exterior disease?
 - A. Whether the pathogen is Wind-Cold or Wind-Heat
 - B. The struggle between Zheng Qi and the pathogenic factor
 - C. The season in which the illness occurs
 - D. The patient's baseline body temperature
7. Alternating feeling of cold and heat indicates the pathogen is at which stage?
 - A. Tai Yang
 - B. Yang Ming
 - C. Shao Yang
 - D. Jue Yin
8. Depression with insomnia, palpitations, tiredness, weak limbs, and loose stools indicates:
 - A. Liver-Qi stagnation
 - B. Spleen and Heart-Blood deficiency
 - C. Kidney-Yang deficiency
 - D. Phlegm-Fire harassing the Mind

9. Severe anxiety with palpitations, manic behavior, mental confusion, and a swollen tongue indicates:

- A. Heart-Blood stasis
- B. Liver-Fire
- C. Phlegm-Fire harassing the Mind
- D. Heart-Yin deficiency with Empty-Heat

10. Impotence with feeling of cold, backache, and abundant clear urination indicates:

- A. Heart-Blood deficiency
- B. Kidney-Yang deficiency
- C. Damp-Heat in the Liver channel
- D. Heart-Fire

11. Which of the following is TRUE regarding excessive sexual desire?

- A. It only occurs in women, per the underlying mechanism
- B. It can result from Liver or Heart-Fire, or Empty-Heat from Kidney-Yin deficiency, in either sex
- C. It is always a sign of Kidney-Yang excess
- D. It cannot be differentiated from lack of libido

12. Periods that are irregular — sometimes early, sometimes late — most likely indicate:

- A. Blood-Heat
- B. Stagnation of Liver-Qi or Liver-Blood, or Spleen deficiency
- C. Kidney-Yang deficiency
- D. Exhaustion of the Chong Vessel

13. Vomiting during pregnancy is attributed to:

- A. Liver-Blood stasis
- B. Stomach and Chong Vessel disharmony
- C. Sinking of Spleen-Qi
- D. Kidney Essence deficiency

14. Which organ governs the production of sound, per the slides?

- A. Kidney
- B. Lung
- C. Spleen
- D. Heart

15. Hoarseness with a plum-pit sensation and cough points to:

- A. Exterior syndrome
- B. Blood stagnation
- C. Phlegm-Heat
- D. Lung and Kidney Yin deficiency

16. Panting due to Kidney deficiency occurs because:

- A. The Kidney generates excess phlegm
- B. The Kidney is unable to absorb qi
- C. The Kidney over-governs the Lung
- D. The Kidney floods the Lung with fluid

17. Which Five Element Sound is paired with Earth?

- A. Shouting
- B. Laughing
- C. Singing
- D. Groaning

18. The Xū 嘘 Healing Sound targets which organ?

- A. Heart
- B. Liver
- C. Kidney
- D. Lung

19. According to the general smell rule, an absent or fishy smell indicates:

- A. Heat or Excess
- B. Cold or Deficient
- C. Blood stasis
- D. Wind invasion

20. A strong, leathery-smelling vaginal discharge indicates:

- A. Damp-Cold
- B. Damp-Heat
- C. Blood deficiency
- D. Qi stagnation

PART D • Fill-in-the-Blank

Heads Up — Fill in every blank before checking the key.

#	Item	Answer (fill in)
1.	Cold fingertips especially (vs. the whole hand) points to _____.	
2.	Sleep depends on the state of Blood and _____, especially of the Heart and Liver.	
3.	Waking up many times during the night indicates _____ deficiency with Empty Heat.	
4.	The intensity of a "fever" depends on the struggle between Zheng Qi and the _____.	
5.	A constant low-grade temperature that doesn't fully clear with sweating suggests _____.	
6.	The organ that alone "knows" what an emotion is, because it houses the Shen, is the _____.	
7.	Severe anxiety with stabbing chest pain radiating to the inner left arm is the TCM description of a _____ (Western term).	
8.	Miscarriage occurring after 3 months is attributed to Liver-Blood stasis or sinking of _____.	
9.	Chronic earache in children is Damp-Heat in the _____ channel.	
10.	Gradual loss of voice indicates Lung-Qi or _____ deficiency.	
11.	The Fire-element voice sound is _____, pinyin xiào.	
12.	The Kidney Healing Sound is Chuī 吹, and it removes wind-cold and urges _____ qi.	
13.	Flatulence that smells rancid and rotten, like rotten eggs, indicates _____ in the Large Intestines.	
14.	The classical Fire-element scorched odor character is _____, though the slide uses a different (likely mislabeled) character.	
15.	Foul, fishy odor from the ears with turbid pus and discharge indicates _____ in the ear.	

PART E · Matching Sets

Heads Up — Match each item on the left to its answer on the right.

Emotional Symptoms — Presentation → Root

Item	Your Answer	Options
1. Depression + lack of direction, sadness		A. Liver-Blood deficiency B. Heart-Yang deficiency C. Liver-Qi stagnation with Qi-Phlegm D. Phlegm-Fire harassing the Mind E. Heart-Blood stasis
2. Depression + cold hands, palpitations		
3. Moodiness/irritability + lump in throat		
4. Palpitations, agitation, purple tongue		
5. Manic behavior, mental confusion, swollen tongue		

Five Element Sounds

Item	Your Answer	Options
1. Shouting		A. Wood B. Fire C. Earth D. Metal E. Water
2. Laughing		
3. Singing		
4. Weeping		
5. Groaning		

Six Healing Sounds

Item	Your Answer	Options
1. Xū 嘘		A. Liver B. Heart C. Spleen D. Lung E. Kidney F. Triple Burner
2. Hē 呵		
3. Hū 呼		
4. Sì 呬		
5. Chuī 吹		
6. Xī 嘻		

Women's Health — Finding → Pattern

Item	Your Answer	Options
1. Purple/blackish blood with clots		A. Blood-Heat B. Blood deficiency C. Stasis of Blood or Cold D. Empty-Heat from Yin deficiency E. Stagnation of Qi or Blood
2. Pale blood		
3. Fresh-red blood		

4. Pain before the period
5. Dark-red or bright-red blood

ANSWER KEY

Part A — Active Recall

#	Answer
1	Tingling = Blood deficiency; numbness (esp. unilateral) = Wind or Wind-Phlegm.
2	Cold fingertips especially = Liver-Qi stagnation (Liver Qi can't send Qi/Blood to the extremities, tips especially, while the torso stays warm).
3	Heart and Liver (Spleen also has influence).
4	Falling asleep = Heart-Blood deficiency (usually). Excessive dreaming = Liver. Waking repeatedly = Yin deficiency with Empty Heat.
5	Prof. Schrier's own slide states "Bonus Material on Sleep Will Not Be Tested On."
6	Yin deficiency; called "five-palm heat."
7	Daytime = Yang deficiency. Night = Yin deficiency.
8	Sudden = Full (Liver-Fire, Liver-Yang rising, or Liver-Wind). Gradual = Empty (Kidney deficiency).
9	The struggle between Zheng Qi (Upright Qi) and the External Pathogenic Factor — not whether the pathogen is Wind-Cold or Wind-Heat.
10	Aversion to cold = subjective (patient feels cold). Fever = objective (body feels hot on palpation).
11	The Heart alone houses the Shen/consciousness and "knows" what an emotion is; every other organ is affected by emotion without being conscious of it.
12	Heart-Blood deficiency; Heart-Yin deficiency (worse in evening, night sweating); Heart and Gall Bladder Qi deficiency (with timidity).
13	Heart-Blood stasis — severe anxiety, palpitations, stabbing/pricking chest pain radiating to the inner left arm or shoulder, purple tongue.
14	Younger men's premature ejaculation is often more about settling the Heart / performance anxiety; older men's is more truly Kidney-rooted.
15	Pain BEFORE the period = stagnation of Qi or Blood. Pain AFTER the period = Blood deficiency.
16	Before 3 months = Blood or Essence deficiency. After 3 months = Liver-Blood stasis, or sinking of Spleen-Qi.
17	The Gall Bladder channel has a documented deep pathway to the ear; know deep pathways, not just the superficial map.
18	Hearing and Smelling — the 2nd of the Four Diagnostic Methods (望聞問切).
19	Lung=production, Kidney=volume, Spleen & Stomach=strength.
20	Rebellious Stomach Qi.
21	Shout=Wood, Laugh=Fire, Sing=Earth, Weep=Metal, Groan=Water.
22	Xū=Liver, Hē=Heart, Hū=Spleen, Sì=Lung, Chuī=Kidney, Xī=Triple Burner.
23	Strong/foul/rotten = Heat or Excess. Absent or fishy = Cold or Deficient.
24	It's labeled with xiào 笑 (same hanzi as Laughing) — classical scorched is jiāo 焦.
25	The Shouting voice sound (Wood) AND the Spleen Healing Sound — same hanzi, different tables.

Part B — True/False

#	Answer
1	T
2	T

3	T
4	F — difficulty falling asleep is usually Heart, though it can be Liver or Spleen.
5	F — it is explicitly marked as NOT tested.
6	T
7	F — daytime sweating indicates Yang deficiency; night sweating indicates Yin deficiency.
8	F — aggravated by pressure indicates a Full condition; alleviated by pressure indicates Empty.
9	T
10	F — intensity depends on the Zheng Qi vs. pathogen struggle, not pathogen type.
11	T
12	T
13	T
14	F — that presentation indicates Liver-Blood deficiency.
15	F — the mechanisms are essentially the same for men and women.
16	F — older men's premature ejaculation is more often Kidney-related; younger men's is more often Heart-related.
17	T
18	F — pain before the period indicates a stagnation (excess) pattern, not deficiency.
19	T
20	T
21	F — Lung governs production; Kidney governs volume.
22	F — it indicates an Empty pattern.
23	F — that presentation points to Lung and Kidney Yin deficiency.
24	T
25	F — strong/foul indicates Heat or Excess; absence of smell or fishy smell indicates Cold.
26	F — unlike the Five Element Sounds slides, these do not explicitly state an element per odor.
27	F — it indicates exhaustion of Kidney fire (Yang).
28	T

Part C — Multiple Choice

#	Answer
1	C. Dampness
2	B. Stomach and Spleen-Qi deficiency
3	D — excess Liver-Fire is not one of the listed Empty-condition causes (it's a different, Full mechanism from the "very restless sleep" entry)
4	B. Stomach and Spleen deficiency
5	B. Liver-Yang, Liver-Fire, or Liver-Wind
6	B. The struggle between Zheng Qi and the pathogenic factor
7	C. Shao Yang
8	B. Spleen and Heart-Blood deficiency

9	C. Phlegm-Fire harassing the Mind
10	B. Kidney-Yang deficiency
11	B. It can result from Liver or Heart-Fire, or Empty-Heat from Kidney-Yin deficiency, in either sex
12	B. Stagnation of Liver-Qi or Liver-Blood, or Spleen deficiency
13	B. Stomach and Chong Vessel disharmony
14	B. Lung
15	C. Phlegm-Heat
16	B. The Kidney is unable to absorb qi
17	C. Singing
18	B. Liver
19	B. Cold or Deficient
20	B. Damp-Heat

Part D — Fill-in-the-Blank

#	Answer
1	Liver-Qi stagnation
2	Yin
3	Yin
4	External Pathogenic Factor (pathogenic factor / EPF)
5	Damp-Heat
6	Heart
7	heart attack
8	Spleen-Qi
9	Gall Bladder
10	Lung-Yin
11	Laughing
12	stagnant
13	Toxic Heat
14	jiāo 焦
15	Damp-heat

Part E — Matching

Set	Answers (in order)
Emotional Symptoms	1-A (Liver-Blood deficiency), 2-B (Heart-Yang deficiency), 3-C (Liver-Qi stagnation w/ Qi-Phlegm), 4-E (Heart-Blood stasis), 5-D (Phlegm-Fire harassing the Mind)
Five Element Sounds	1-A (Wood), 2-B (Fire), 3-C (Earth), 4-D (Metal), 5-E (Water)
Six Healing Sounds	1-A (Liver), 2-B (Heart), 3-C (Spleen), 4-D (Lung), 5-E (Kidney), 6-F (Triple Burner)

Women's Health	1-C (Stasis of Blood or Cold), 2-B (Blood deficiency), 3-D (Empty-Heat from Yin deficiency), 4-E (Stagnation of Qi or Blood), 5-A (Blood-Heat)
----------------	--
