

✨ EAM310 • Pulse & Tongue Journal

Full 50-Entry Practice Log • Companion to the Workbook

EAM Diagnosis I • Summer 2026 • Jon Centeno • VUIM DAChM

Instructions & how to use this booklet

Observe your own tongue and pulse daily. Record findings in the templates that follow. Note: time of day, recent meals, sleep, and emotional state all affect findings — practice noticing changes. The goal is developing observational sensitivity, not diagnosing yourself.

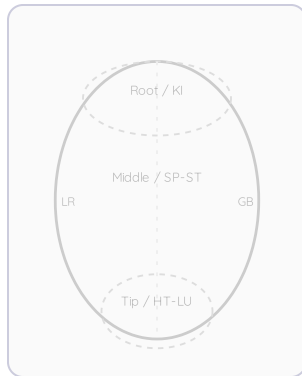

One entry per sheet, 50 sheets, pre-numbered 1–50 — matching the syllabus exactly (Entries 1–25 due at Midterm/Week 5; Entries 26–50 due at Final/Week 10). Just fill in the date, time, and your observations as you go. S Pen / stylus users: write directly on the blank lines and boxes at full print size.
