Blind ID Drills · Both Directions · Error Log

Week 9 · Inquiry Continued (Limbs–Children) & Diagnosis by Hearing & Smelling — 聞診 · Lecture 9 (Final Lecture)

TCM for Ballroom Dancers

reMarkable Edition

Target: Drill until you can answer each item in under 3 seconds, both directions (Parts A–G forward, Part H reverse), with zero hesitation.

How drilling differs from studying: Reading builds understanding. Drilling builds **speed**. You can understand every table in the Study Guide and still blank under time pressure — these drills fix that. Fifteen minutes daily beats two hours on Sunday, especially with the Final one week out.
