

How to Use This Kit

Cumulative Final Exam Prep · Weeks 1–9

Prof. Daniel Schrier, D.O.M., L.Ac. | Final: Friday, Sept. 11, 2026
Compiled by Jon (GTA) for EAM310 classmates

TCM for Ballroom Dancers

reMarkable Edition

Read This First

This kit was built for the whole class, not just for me. Everything traces back to Schrier's slides and lecture transcripts, cross-checked against Maciocia (FCM) and Cheng Xinnong (CAM). Where something is a judgment call or open question, it's flagged — not smoothed over.

What's in the Kit

Document	What it's for	When to use it
Study Guide	Full-depth reference, organized by exam type (Look/Ask/Feel/Listen-Smell) and by week.	First pass, or when a Quiz/Drill question stumps you.
Cram Sheet	Condensed recall tables, "Quick Recall" lines, gold Heads-Up boxes for traps.	Any time you have 15 minutes.
Drill Pack	Active-recall short-answer drills.	After the Study Guide's first pass — this is where it sticks.
Quiz Pack	Multiple-choice, styled like Schrier's actual quizzes.	Timed self-testing.
EXCEPT/NOT Pack	Practice with the "which is NOT/EXCEPT" format specifically.	Once content feels solid.

Two Versions

Version	Coverage	Best for
Full Cumulative	Weeks 1–9, equal depth.	One complete reference; Weeks 1–5 haven't been reviewed recently.
6–9 Deep + 1–5 Review	Weeks 6–9 (Four Examinations) in full depth; Weeks 1–5 condensed.	Weeks 1–5 feel solid; focus your remaining time on newer material.

Heads up: the Four Examinations (Weeks 6–9) are the newest, least-reviewed material — budget extra time there either way.

Dance-medicine connection: the Four Examinations map cleanly onto how you already assess a partner or student before a lesson — Look (posture, gait), Ask (pain, fatigue, cycle timing for female dancers), Feel (muscle tone, pulse), Listen (breath sounds under exertion). Use that instinct — it's the same discipline.

Suggested Plan — 5 Days to Sept. 11

Day	Focus
Today (Sat)	Cold skim of the Cram Sheet, start to finish — just find the gaps, don't fix them yet.
Sun	Study Guide, Weeks 6–9. Newest material first.
Mon	Drill Pack, Weeks 6–9, then a fast refresh of Weeks 1–5 (Pulse, Tongue, 8 Principles).
Tue	Full Quiz Pack, timed. Review every miss against the Study Guide.
Wed	EXCEPT/NOT Pack + second Cram Sheet pass. Sleep beats one more hour of drilling.
Thu (day before)	Cram Sheet only. Light review, early to bed.

Open Flags — Confirm with Prof. Schrier Before the Final

- 1. Scorched odor character:** Week 8/9 materials use 笑 (xiào) where the classical character is 焦 (jiāo). Flagged, not silently corrected.

2. Five Named Odors ↔ Zang-Fu pairing: source slides don't explicitly pair each odor to a Zang-Fu organ — not yet in this kit.
