

Quiz Pack

55 Questions + 3 Matching Sets · True/False · Multiple Choice · Fill-in-Blank · Matching · Active Recall · Full Answer Key

Week 8 · Diagnosis by Hearing & Smelling — 聞診 · Lecture 8

TCM for Ballroom Dancers

reMarkable Edition

Source note: Built from Prof. Schrier's Hearing & Smelling slide deck. Week 8's recorded lecture did not reach this material live, so there is no matching transcript to cross-check against.

How to use this pack: Take the parts in order — built easy → hard on purpose. Close every source before starting.

Target scores: Part A: 90%+ (if lower, the base isn't set) · Part B/C: 85%+ · Part D/E: 80%+ · 80%+ overall means genuinely ready.

PART A · Active Recall — Write From Memory

Heads Up — Cover all sources. Write your answer on the line before checking the key.

1. What are the two components of 聞診 (Wén Zhén)?

2. Which three organs govern the voice, and what aspect does each govern?

3. Loud voice vs. weak voice — what does each indicate?

4. What differentiates chronic hoarseness from Blood stagnation vs. from Lung/Kidney Yin deficiency?

5. Contrast Excess/Heat vs. Empty/Cold respiration across sound, breath quality, and onset.

6. What is the shared root mechanism of vomiting, belching, and hiccup?

7. What is the general rule linking smell strength/quality to Heat vs. Cold?

8. List the Five Element Sounds and their elements.

9. Name the Six Healing Sounds and their target organs.

10. What are the two aspects of Diagnosis by Smelling and what does each tell you?

11. Name the Five (named) Odors from the slides.

12. What copy/paste-style error appears on the 'Scorched' odor slide?

13. What does strong/rotten-smelling sputum indicate vs. fishy-smelling sputum?

14. What does a heavy smell of urea with scanty yellow urine indicate?

15. What sound does Hū 呼 refer to in two different contexts in this deck?

PART B • True / False

Heads Up — Mark each statement T or F. About a third are deliberately false — including a few classic trap statements.

#	Statement	Answer
1.	Kidney governs the production of the voice.	T / F
2.	A weak, thin breathing sound indicates a Full pattern.	T / F
3.	Sudden loss of voice is caused by invasion of Wind-Heat.	T / F
4.	Hoarseness that is chronic and worse in the evening points to Blood stagnation.	T / F
5.	Panting worse with movement, with timid breath and low voice, is a Deficiency pattern.	T / F
6.	A dry cough indicates Lung-Yin deficiency.	T / F
7.	Loud, forceful vomiting with sudden onset indicates ST deficiency and Cold.	T / F
8.	Borborygmi that is loud usually accompanies diarrhea or dysentery and is a Full pattern.	T / F
9.	Yawning accompanied by chest pain, occurring after injury or chronic illness, points to Blood and Qi Stagnation.	T / F
10.	The Weeping voice sound is paired with the Metal element.	T / F
11.	The Six Healing Sounds each correspond to a Five Element Sound.	T / F
12.	The general smell rule states that a strong or foul odor indicates Cold.	T / F
13.	The Five (named) Odor slides explicitly pair each odor with a Zang-Fu element.	T / F
14.	Fishy-smelling vaginal discharge indicates Damp-Cold.	T / F
15.	Odorless urinary incontinence indicates Kidney Yin deficiency.	T / F
16.	Sputum without any smell indicates Cold.	T / F
17.	A short, low belching sound indicates a Full pattern.	T / F
18.	Sneezing due to external stimulation (e.g. dust, pepper) is considered a normal reaction, not a pattern.	T / F

PART C · Multiple Choice

Heads Up — Standard 4-option format. Distractors are drawn from real adjacent content — read all four before picking.

1. Which organ governs the production of sound, per the slides?
 - A. Kidney
 - B. Lung
 - C. Spleen
 - D. Heart
2. A patient with reluctance to talk most likely has:
 - A. Heat, or Stomach-Qi excess
 - B. Cold pattern, or Lung-Qi deficiency
 - C. Blood stasis
 - D. Liver-Yang rising
3. Hoarseness with a plum-pit sensation and cough points to:
 - A. Exterior syndrome
 - B. Blood stagnation
 - C. Phlegm-Heat
 - D. Lung and Kidney Yin deficiency
4. Which is the Excess/Heat presentation of Respiration?
 - A. Low sound, faint/slow breath, slow onset
 - B. Loud sound, rough/distressed breath, acute onset
 - C. No sound, shallow breath
 - D. Rapid but silent breathing
5. Panting due to Kidney deficiency occurs because:
 - A. The Kidney generates excess phlegm
 - B. The Kidney is unable to absorb qi
 - C. The Kidney over-governs the Lung
 - D. The Kidney floods the Lung with fluid
6. A loud, forceful hiccup is most often caused by:
 - A. ST-Qi deficiency
 - B. ST-Yin deficiency
 - C. LV-Qi invading the Stomach
 - D. SP-Qi sinking
7. Borborygmi that is low in sound points to:
 - A. Damp-Heat in ST & Intestines
 - B. SP/KI yang deficiency, or MB qi deficiency
 - C. LV-Qi invading the Stomach
 - D. Phlegm-Heat obstructing the Lung
8. Which Five Element Sound is paired with Earth?
 - A. Shouting
 - B. Laughing
 - C. Singing
 - D. Groaning
9. The Xū 嘘 Healing Sound targets which organ?
 - A. Heart
 - B. Liver
 - C. Kidney
 - D. Lung

10. According to the general smell rule, an absent or fishy smell indicates:

- A. Heat or Excess
- B. Cold or Deficient
- C. Blood stasis
- D. Wind invasion

11. Which odor is described on the slides as cloying and sickly sweet rather than pleasant?

- A. Rancid
- B. Scorched
- C. Fragrant
- D. Putrid

12. A strong, leathery-smelling vaginal discharge indicates:

- A. Damp-Cold
- B. Damp-Heat
- C. Blood deficiency
- D. Qi stagnation

PART D • Fill-in-the-Blank

Heads Up — Fill in every blank before checking the key.

#	Item	Answer (fill in)
1.	Sputum with no smell indicates _____.	
2.	Sudden loss of voice is caused by invasion of _____.	
3.	Gradual loss of voice indicates Lung-Qi or _____ deficiency.	
4.	The Fire-element voice sound is _____, pinyin xiào.	
5.	The Kidney Healing Sound is Chuī 吹, and it removes wind-cold and urges _____ qi.	
6.	Strong-smelling sweat indicates _____.	
7.	Frequent, urgent, painful, burning, turbid yellow urine with foul odor indicates _____ in the Bladder.	
8.	Flatulence that smells rancid and rotten, like rotten eggs, indicates _____ in the Large Intestines.	
9.	The classical Fire-element scorched odor character is _____, though the slide uses a different (likely mislabeled) character.	
10.	Foul, fishy odor from the ears with turbid pus and discharge indicates _____ in the ear.	

PART E · Matching Sets

Heads Up — Match each item on the left to its answer on the right.

Five Element Sounds

Item	Your Answer	Options
1. Shouting		A. Wood B. Fire C. Earth D. Metal E. Water
2. Laughing		
3. Singing		
4. Weeping		
5. Groaning		

Six Healing Sounds

Item	Your Answer	Options
1. Xū 嘘		A. Liver B. Heart C. Spleen D. Lung E. Kidney F. Triple Burner
2. Hē 呵		
3. Hū 呼		
4. Sì 呬		
5. Chuī 吹		
6. Xī 嘻		

Odor of Secretions → Pattern

Item	Your Answer	Options
1. Fishy sputum		A. Lung-Heat B. Heart fire → Bladder C. Damp-Cold D. Liver qi stagnation E. Kidney deficiency
2. Heavy urea smell, scanty yellow urine		
3. Clear, frequent, odorless urine		
4. Fishy vaginal discharge		
5. Slight/odorless flatulence, emotional stress		

ANSWER KEY

Part A — Active Recall

#	Answer
1	Hearing and Smelling — the 2nd of the Four Diagnostic Methods (望聞問切).
2	Lung=production, Kidney=volume, Spleen & Stomach=strength.
3	Loud=Full/Heat. Weak=Empty/Cold.
4	Blood stagnation=chronic, gradual intensity. Yin deficiency=chronic, gradual, worse in the evening.
5	Excess/Heat: loud sound, rough/distressed breath, acute onset. Empty/Cold: low sound, faint/slow breath, slow onset.
6	Rebellious Stomach Qi.
7	Strong/foul/rotten = Heat or Excess. Absent or fishy = Cold or Deficient.
8	Shout=Wood, Laugh=Fire, Sing=Earth, Weep=Metal, Groan=Water.
9	Xū=Liver, Hē=Heart, Hū=Spleen, Sì=Lung, Chuī=Kidney, Xī=Triple Burner.
10	Body odor=pattern + constitutional type. Odor of secretions=nature of the pattern only.
11	Rancid, Scorched, Fragrant, Rotten, Putrid.
12	It's labeled with xiào 笑 (same hanzi as Laughing) — classical scorched is jiāo 焦.
13	Strong/rotten=Heat in Lungs, usually Phlegm-Heat or Toxic Heat. Fishy=Lung-Heat.
14	Heart fire pouring downward into the Bladder.
15	The Shouting voice sound (Wood) AND the Spleen Healing Sound — same hanzi, different tables.

Part B — True/False

#	Answer
1	F — Lung governs production; Kidney governs volume.
2	F — it indicates an Empty pattern.
3	T
4	F — that presentation points to Lung and Kidney Yin deficiency.
5	T
6	T
7	F — that presentation indicates ST-Heat (an Excess/Heat pattern).
8	T
9	T
10	T
11	F — they are two separate lists (voice-quality diagnosis vs. a qigong healing practice); only Hū 呼 happens to share a hanzi across both.
12	F — strong/foul indicates Heat or Excess; absence of smell or fishy smell indicates Cold.
13	F — unlike the Five Element Sounds slides, these do not explicitly state an element per odor.
14	T
15	F — it indicates exhaustion of Kidney fire (Yang).

16	T
17	F — short/low belching indicates ST-Qi deficiency, an Empty pattern.
18	T

Part C — Multiple Choice

#	Answer
1	B. Lung
2	B. Cold pattern, or Lung-Qi deficiency
3	C. Phlegm-Heat
4	B. Loud sound, rough/distressed breath, acute onset
5	B. The Kidney is unable to absorb qi
6	C. LV-Qi invading the Stomach
7	B. SP/KI yang deficiency, or MB qi deficiency
8	C. Singing
9	B. Liver
10	B. Cold or Deficient
11	C. Fragrant
12	B. Damp-Heat

Part D — Fill-in-the-Blank

#	Answer
1	Cold
2	Wind-Heat
3	Lung-Yin
4	Laughing
5	stagnant
6	Damp-Heat
7	Damp-Heat
8	Toxic Heat
9	jiāo 焦
10	Damp-heat

Part E — Matching

Set	Answers (in order)
Five Element Sounds	1-A (Wood), 2-B (Fire), 3-C (Earth), 4-D (Metal), 5-E (Water)
Six Healing Sounds	1-A (Liver), 2-B (Heart), 3-C (Spleen), 4-D (Lung), 5-E (Kidney), 6-F (Triple Burner)
Odor → Pattern	1-A (Lung-Heat), 2-B (Heart fire → Bladder), 3-E (Kidney deficiency), 4-C (Damp-Cold), 5-D (Liver qi stagnation)
