

EAM310 · EAM DIAGNOSIS I · VUIM · SUMMER 2026

Quiz Pack

115 Questions + Worksheet + Cases + Full Answer Keys

Prof. Daniel Schrier, D.O.M., L.Ac.

Week 3 · Pulse Diagnosis · Summer 2026

Jonathan Centeno · D.AcHM Candidate · VUIM 2026–2030

How to use this pack

Take them in order — they're built easy → hard on purpose. Close every source. Route every miss to the Error Log in the Drill Pack. **115 questions, all with keys and explanations.**

Target scores

Quiz 1: 90%+ (if lower, the base isn't set) · Quiz 2: 85%+ · Quiz 3: 80%+ · Quiz 4: 80%+ means genuinely ready.

PART A · Worksheet — Mixed Format + Cases

How to use this

Cover the Workbook. Answer from memory. Then check against the Answer Key at the back — recognition is not recall.

A Active Recall

1. Name all six pulse positions with their Nan Jing organ pairings (L and R).

2. List the five finger movements and what each checks for.

3. What three qualities define a normal pulse? Give characters and meanings.

4. List all eight components of a normal pulse.

5. Name all four seasonal pulses with their date ranges.

6. Floating + Tight = ? Floating + Rapid = ? Floating + Empty = ?

7. Deep + Slow = ? Deep + Rapid = ? Deep + Weak = ?

8. Differentiate Knotted, Hasty, and Intermittent by speed and pause pattern.

9. Which of the 28 is generally a HEALTHY pulse, and what defines it?

10. Give the classical image for: Slippery, Choppy, Hollow, Leather, Scattered.

11. What are the four indications of a Slippery pulse?

12. How do you differentiate Exterior-floating from Yin-Deficiency-floating?

13. What does a Flooding pulse in winter signify, and why?

14. Whose breath is the pulse rate counted against, and what is the normal range?

15. Name the three Deficiency-side qualities on Schrier's comparison chart.

B Multiple Choice

1. The Nan Jing pairing for the LEFT Chǐ position is:
 - A. Kidney-Yin only
 - B. Foot Taiyang/BL · Foot Shaoyin/KD
 - C. Hand Shaoyang/TB · Hand Jueyin/PC
 - D. Foot Jueyin/LR

2. A pulse beating 4 times per breath, faster than Slow, generally indicates:
 - A. Cold pattern
 - B. Yang Deficiency
 - C. A healthy pulse (Huǎn)
 - D. Interior Heat

3. Which pulse is classically 'a pearl rolling on a plate'?
 - A. Choppy
 - B. Slippery
 - C. Moving
 - D. Soggy

4. Intermittent (代 Dài) differs from Knotted and Hasty because:
 - A. It is faster
 - B. Its pauses occur at regular intervals
 - C. It is only felt at the deep level
 - D. It indicates Blood stasis

5. A Flooding pulse felt in winter most likely indicates:
 - A. Normal seasonal variation
 - B. A warning sign of excess Yang
 - C. Yang Deficiency
 - D. Blood Deficiency

6. 'Scraping bamboo with a small knife' describes:
 - A. Tight
 - B. Wiry
 - C. Choppy
 - D. Firm

7. Floating + Empty may indicate Summer-Heat OR Yin Deficiency. The differentiator is:
 - A. Rate
 - B. Degree of floating
 - C. Position
 - D. Rhythm

8. Which indicates severe Kidney-Essence/Kidney-Yin deficiency?
 - A. Hollow
 - B. Leather
 - C. Scattered
 - D. Hidden

9. The Hidden pulse (伏 Fú) is felt only by:

- A. Light touch
 - B. Moderate pressure
 - C. Pressing very heavily to the bone
 - D. Rolling
-

10. Wiry + Rapid indicates:

- A. Liver-Fire
 - B. Cold in the Liver channel
 - C. Blood Stasis
 - D. Liver-Yang rising
-

11. Normal pulse rate per Schrier's slides is:

- A. 40–60 bpm
 - B. 60–90 bpm
 - C. 90–140 bpm
 - D. 140–180 bpm
-

12. 'Flower blossoms lightly scattering to the ground' is:

- A. Soggy
 - B. Minute
 - C. Scattered
 - D. Moving
-

C True / False

1. The pulse rate is traditionally counted against the patient's breath, not the practitioner's. TRUE / FALSE

2. A Slippery pulse can indicate pregnancy. TRUE / FALSE

3. Hasty is Slow with irregular stops. TRUE / FALSE

4. Huǎn (Slowed-Down/Moderate) is a pathological pulse. TRUE / FALSE

5. Floating always indicates an Exterior pattern. TRUE / FALSE

6. Deep + Wiry can indicate a Chong Mai issue. TRUE / FALSE

7. Leather and Hollow both feel hollow beneath the surface. TRUE / FALSE

8. The Chǐ position on the right pairs Kidney with Bladder per Nan Jing. TRUE / FALSE

D Clinical Cases

Case 1

A 34-year-old dancer presents 2 days after onset of chills and fever occurring together, with occipital stiffness, no sweating, and body aches. Pulse is Floating and Tight.

1.1 Name the pulse combination and its indication.

1.2 Which Eight Principles categories does this place her in?

1.3 What single finding would tell you the pathogen had moved Interior?

Case 2

A 58-year-old presents in January with a wide, forceful pulse that fades gently, plus irritability and thirst for cold drinks.

2.1 Name the pulse quality.

2.2 Is this seasonally appropriate? Explain.

2.3 What did Schrier's teaching case warn about this presentation?

Case 3

A patient's pulse is thin like a fine thread but distinct, with no rhythm interruption. She reports dizziness, poor memory, and scanty periods.

3.1 Name the pulse quality and its core indication.

3.2 Which combination would you check for to confirm Yin Deficiency with Empty-Heat?

3.3 Contrast this pulse with Minute/Faint.

E Answer Key

Section A — Active Recall

Answers are in Workbook §1–8. Self-check each against the corresponding reference table.

#	Answer
1	B
2	C
3	B
4	B
5	B
6	C
7	B
8	B
9	C
10	A
11	B
12	C

#	True/False — Answer
1	FALSE — the practitioner's.
2	TRUE
3	FALSE — Hasty is RAPID with irregular stops; Knotted is slow.
4	FALSE — generally healthy.
5	FALSE — also Yin Deficiency.
6	TRUE
7	TRUE
8	FALSE — right Chǐ = TB/PC; left Chǐ = BL/KD.

Case 1

Floating + Tight = **Exterior Wind-Cold**. Eight Principles: Exterior / Cold / Excess (Yang-category on the Exterior axis). The pathogen has moved Interior the moment the SIMULTANEOUS aversion-to-cold-and-fever disappears — and the Floating pulse should go with it.

Case 2

Overflowing / Flooding 洪. NOT seasonally appropriate — Flooding belongs to summer (May 5–Aug 6); this is January. Schrier's case: a patient with winter Flooding who declined treatment suffered a cerebral hemorrhage the following summer when seasonal Yang rise compounded already-excessive Yang.

Case 3

Fine/Thin 細 — Blood Deficiency. Check **Fine-Rapid** to confirm Yin Deficiency with Empty-Heat. Minute/Faint 微 is more extreme: extremely thin AND forceless, fading in and out, indicating severe Qi AND Blood depletion — Fine stays distinct and clear.

PART B · Quiz 1 — Foundations

Quiz 1 — Foundations

20 questions.

1. The LEFT Cùn position corresponds to which organs per Nan Jing?

- A. Hand Taiyang/SI · Hand Shaoyin/HT
- B. Hand Yangming/LI · Hand Taiyin/LU
- C. Foot Shaoyang/GB · Foot Jueyin/LR
- D. Foot Taiyang/BL · Foot Shaoyin/KD

2. The RIGHT Chǐ position corresponds to:

- A. Kidney–Yang only
 - B. Hand Shaoyang/TB · Hand Jueyin/PC
 - C. Foot Taiyang/BL · Foot Shaoyin/KD
 - D. Foot Yangming/ST · Foot Taiyin/SP
-

3. Which finger movement checks LENGTH?

- A. Lifting
 - B. Pressing
 - C. Searching
 - D. Rolling
-

4. Which finger movement checks SHAPE?

- A. Pushing
 - B. Rolling
 - C. Searching
 - D. Lifting
-

5. How many finger movements does FCM Ch.25 describe?

- A. Three
 - B. Four
 - C. Five
 - D. Six
-

6. 胃 Wèi in a normal pulse refers to:

- A. Root at the Chǐ position
 - B. Flowing, gentle, harmonious movement
 - C. Strong, rhythmical beat
 - D. Moderate width
-

7. 根 Gēn refers to:

- A. Spirit
 - B. Stomach–Qi
 - C. Root — depth felt at Chǐ
 - D. Tension
-

8. Normal pulse rate per Schrier's slides:

- A. 40–60 bpm
 - B. 60–90 bpm
 - C. 90–140 bpm
 - D. Over 140 bpm
-

9. Pulse rate is counted against whose breath?

- A. The patient's
 - B. The practitioner's
 - C. Either
 - D. A metronome
-

10. Which is NOT one of the eight components of a normal pulse?

- A. Width
 - B. Tension
 - C. Colour
 - D. Shape
-

11. Normal DEPTH for a pulse is:

- A. Superficial
 - B. Middle
 - C. Deep
 - D. Varies by season only
-

12. The Spring pulse is:

- A. Flooding
 - B. Wiry
 - C. Hair-like
 - D. Stone
-

13. The Autumn pulse is:

- A. Stone/Deep
 - B. Wiry
 - C. Hair-like/Floating
 - D. Flooding
-

14. Winter's Stone pulse spans roughly:

- A. Feb 4 – May 4
 - B. May 5 – Aug 6
 - C. Aug 7 – Nov 6
 - D. Nov 7 – Feb 3
-

15. A Wiry pulse in spring with NO other signs or symptoms is:

- A. Always pathological
 - B. Liver-Qi Stagnation
 - C. Likely a normal seasonal pulse
 - D. Blood Stasis
-

16. Rhythm in a normal pulse is most closely tied to:

- A. Lung Qi
 - B. Heart Qi
 - C. Spleen Qi
 - D. Kidney Essence
-

17. Pulse LENGTH is primarily governed by:

- A. Blood
 - B. Qi
 - C. Essence
 - D. Body Fluids
-

18. Which classical text standardised radial-artery pulse-taking across three levels?

- A. Su Wen
- B. Nan Jing
- C. Pulse Classic
- D. Ling Shu

19. Wang Shuhe composed:

- A. Nan Jing
- B. Su Wen
- C. The ten-volume Pulse Classic
- D. Ripples in the Flow

20. Su Wen originally described how many pulse regions?

- A. Three
- B. Six
- C. Nine
- D. Twelve

KEY Answer Key

#	Ans	Why
1	A	Left Cùn = SI + HT. Right Cùn = LI + LU.
2	B	Right Chǐ = TB + PC per Nan Jing — not a Kidney-Yang simplification.
3	D	Rolling = length. Lifting=superficial, Pressing=deep, Searching=rate, Pushing=shape.
4	A	Pushing = shape.
5	C	Five. Maciocia's summary box lists four — know all five.
6	B	胃 Wèi = Stomach-Qi = flowing/gentle/harmonious.
7	C	根 Gēn = Root, felt deep at the Chǐ position; Kidney Qi intact.
8	B	4–5 beats per respiratory cycle = 60–90 bpm.
9	B	Traditionally the practitioner's — assumed the more stable reference.
10	C	Colour is a tongue parameter. The eight are Width, Depth, Rate, Rhythm, Strength, Length, Tension, Shape.
11	B	Middle depth — shows Qi and Blood flow freely interior ↔ exterior.
12	B	Spring = Wiry 弦, roughly Feb 4 – May 4.
13	C	Autumn = Hair-like 毛, Aug 7 – Nov 6.
14	D	Nov 7 – Feb 3.
15	C	Seasonal ≠ pathological when nothing else accompanies it.

#	Ans	Why
16	B	The Heart commands Blood through the vessels.
17	B	Qi plays the major role in length.
18	B	Nan Jing established the radial artery across superficial/middle/deep.
19	C	Wang Shuhe 王叔和 – Pulse Classic, 24 qualities.
20	C	Nine regions: three head, three hands, three feet.

PART C · Quiz 2 – Identifying the 28

Quiz 2 – Identifying the 28

31 questions.

1. Which pulse indicates: **Phlegm. Dampness. Retention of food. Pregnancy.**

- A. Slow
- B. Slippery
- C. Moving
- D. Minute / Faint

2. Which pulse is classically described as: *Pulsation seeming to come from beneath the bone and tendons.*

- A. Slippery
- B. Hidden
- C. Weak / Frail
- D. Soggy

3. Which pulse is classically described as: *Now you see it, now you don't.*

- A. Hollow
- B. Knotted
- C. Hidden
- D. Minute / Faint

4. Which pulse indicates: **Pathogenic factor in the Interior (Deep-Full). Yang Deficiency (Deep-Weak).**

- A. Leather
- B. Tight
- C. Firm / Confined
- D. Deep / Submerged

5. Which pulse is classically described as: *A bean bouncing in the vessel – well-defined peaks, no head or tail.*

- A. Leather
- B. Moving
- C. Firm / Confined
- D. Hasty

6. Which pulse indicates: **Heat pattern. Full-Heat (Rapid+Full). Empty-Heat (Rapid+Floating-Empty).**

- A. Rapid
 - B. Empty / Deficient
 - C. Wiry
 - D. Floating
-

7. Which pulse indicates: **Heat patterns.**

- A. Tight
 - B. Overflowing / Flooding
 - C. Long
 - D. Minute / Faint
-

8. Which pulse is classically described as: *Scraping bamboo with a small knife.*

- A. Hidden
 - B. Choppy
 - C. Leather
 - D. Floating
-

9. Which pulse indicates: **Full-Heat. Empty-Heat (Overflowing-Empty).**

- A. Choppy
 - B. Floating
 - C. Fine / Thin
 - D. Overflowing / Flooding
-

10. Which pulse indicates: **Full pattern. Full-Heat (Full+Rapid). Full-Cold (Full+Slow).**

- A. Weak / Frail
 - B. Overflowing / Flooding
 - C. Slippery
 - D. Full / Excessive
-

11. Which pulse is classically described as: *The surface of a drum — thick on top, hollow beneath.*

- A. Soggy
 - B. Slowed-Down / Moderate
 - C. Choppy
 - D. Leather
-

12. Which pulse is classically described as: *Wood floating on the surface of water; a subtle breeze across a bird's back; scallion leaves rolled lightly between the fingers.*

- A. Tight
 - B. Deep / Submerged
 - C. Moving
 - D. Floating
-

13. Which pulse indicates: **Blood Deficiency. Exhaustion of Body Fluids.**

- A. Choppy
 - B. Knotted
 - C. Weak / Frail
 - D. Minute / Faint
-

14. Which pulse is classically described as: *A pearl rolling on a plate; a raindrop gliding off a leaf.*

- A. Slow
 - B. Firm / Confined
 - C. Hidden
 - D. Slippery
-

15. Which pulse indicates: **Invasion of external Wind. Yin Deficiency (interior condition presenting superficially).**

- A. Floating
 - B. Soggy
 - C. Firm / Confined
 - D. Hasty
-

16. Which pulse indicates: **Severe Qi Deficiency. Stomach-Qi Deficiency.**

- A. Overflowing / Flooding
 - B. Hollow
 - C. Moving
 - D. Short
-

17. Which pulse is classically described as: *Agitated and urgent, like a man running and suddenly falling down.*

- A. Knotted
 - B. Hasty
 - C. Slow
 - D. Weak / Frail
-

18. Which pulse indicates: **Qi Deficiency.**

- A. Floating
 - B. Empty / Deficient
 - C. Wiry
 - D. Intermittent
-

19. Which pulse indicates: **Severe deficiency of Qi and Blood.**

- A. Long
 - B. Choppy
 - C. Minute / Faint
 - D. Hidden
-

20. Which pulse is classically described as: *A spring stretched on a musical instrument; a guitar string about to snap.*

- A. Soggy
 - B. Overflowing / Flooding
 - C. Wiry
 - D. Tight
-

21. Which pulse indicates: **Cold — Exterior (Tight-Floating), Interior Full-Cold (Tight-Full-Deep), Interior Empty-Cold (Tight-Weak-Deep). Pain.**

- A. Wiry
 - B. Tight
 - C. Fine / Thin
 - D. Leather
-

22. Which pulse is classically described as: *Fingers on a highly stretched twisted cord, snapping back and forth.*

- A. Soggy
 - B. Deep / Submerged
 - C. Choppy
 - D. Tight
-

23. Which pulse is classically described as: *A strand of cotton floating on water; a bubble that bursts under light pressure.*

- A. Overflowing / Flooding
 - B. Choppy
 - C. Knotted
 - D. Soggy
-

24. Which pulse is classically described as: *A stone thrown into a well, sinking to the bottom.*

- A. Soggy
 - B. Floating
 - C. Firm / Confined
 - D. Deep / Submerged
-

25. Which pulse is classically described as: *A scallion stalk — has an edge but is hollow inside.*

- A. Hollow
 - B. Slippery
 - C. Knotted
 - D. Rapid
-

26. Which pulse is classically described as: *A water balloon — big on the outside, nothing solid when you press in.*

- A. Rapid
 - B. Overflowing / Flooding
 - C. Empty / Deficient
 - D. Slowed-Down / Moderate
-

27. Which pulse is classically described as: *Ocean waves that come strongly but leave calmly.*

- A. Scattered
 - B. Slowed-Down / Moderate
 - C. Intermittent
 - D. Overflowing / Flooding
-

28. Which pulse is classically described as: *Angel-hair pasta rather than a thick udon noodle.*

- A. Rapid
 - B. Slippery
 - C. Fine / Thin
 - D. Tight
-

29. Which pulse indicates: **Cold pattern. Empty–Cold (Slow+Weak). Full–Cold (Slow+Full).**

- A. Slow
 - B. Soggy
 - C. Hollow
 - D. Rapid
-

30. Which pulse is classically described as: *Flower blossoms lightly scattering to the ground*.

- A. Weak / Frail
- B. Scattered
- C. Slow
- D. Wiry

31. Which pulse indicates: **Blood Deficiency. Dampness with severe Qi Deficiency.**

- A. Full / Excessive
- B. Deep / Submerged
- C. Fine / Thin
- D. Firm / Confined

KEY Answer Key

#	Ans	Why
1	B	Slippery 滑.
2	B	Hidden 伏 Fú.
3	D	Minute / Faint 微 Wēi.
4	D	Deep / Submerged 沉.
5	B	Moving 動 Dòng.
6	A	Rapid 數.
7	C	Long 長.
8	B	Choppy 澀 Sè.
9	D	Overflowing / Flooding 洪.
10	D	Full / Excessive 實.
11	D	Leather 革 Gé.
12	D	Floating 浮 Fú.
13	A	Choppy 澀.
14	D	Slippery 滑 Huá.
15	A	Floating 浮.
16	D	Short 短.
17	B	Hasty 促 Cù.
18	B	Empty / Deficient 虛.
19	C	Minute / Faint 微.

#	Ans	Why
20	C	Wiry 弦 Xián.
21	B	Tight 緊.
22	D	Tight 緊 Jǐn.
23	D	Soggy 濡 Rú.
24	D	Deep / Submerged 沉 Chén.
25	A	Hollow 芤 Kōu.
26	C	Empty / Deficient 虛 Xū.
27	D	Overflowing / Flooding 洪 Hóng.
28	C	Fine / Thin 細 Xì.
29	A	Slow 遲.
30	B	Scattered 散 Sǎn.
31	C	Fine / Thin 細.

PART D · Quiz 3 — Combinations

Quiz 3 — Combinations

34 questions.

1. Overflowing-Slippery indicates:

- A. Qi and Blood stagnation; retention of food; internal Cold; internal Heat
- B. Phlegm-Heat with prevalence of Heat
- C. interior Cold
- D. severe Qi and Yang Deficiency

2. Slow-Weak indicates:

- A. severe Empty-Heat from Yin Deficiency
- B. Wind-Heat with intense Heat — can progress quickly to the Qi level
- C. Empty-Cold with Yang Deficiency
- D. Liver-Fire and Heart-Fire

3. Slow-Slippery indicates:

- A. Qi & Blood Deficiency with Dampness
- B. accumulation in the Interior
- C. Cold-Phlegm or Damp-Cold
- D. Painful Obstruction (Bi) Syndrome

4. Weak-Choppy indicates:

- A. Blood Stasis
 - B. Wind-Heat with intense Heat — can progress quickly to the Qi level
 - C. Blood Deficiency
 - D. internal Heat
-

5. Full-Long indicates:

- A. severe Qi & Blood Deficiency with internal Cold
 - B. Cold-Phlegm
 - C. Heat
 - D. severe Deficiency of Yuan Qi with floating of Yang, or with Yin Fire
-

6. Knotted-Choppy indicates:

- A. Dampness in the Interior
 - B. Blood Stasis
 - C. accumulation in the Interior
 - D. Heat
-

7. Slow-Floating indicates:

- A. Phlegm-Heat with prevalence of Heat
 - B. weakness of the Wei Qi
 - C. exterior Wind-Cold with prevalence of Wind
 - D. Deficiency of Wei Qi with Dampness
-

8. Moving-Weak indicates:

- A. Wind-Cold invasion, prevalence of Cold
 - B. Shock
 - C. internal Cold and Blood Stasis
 - D. Lung-Qi Deficiency
-

9. Short-Slow indicates:

- A. severe Deficiency of Yuan Qi with floating of Yang, or with Yin Fire
 - B. Yang Deficiency with internal Cold
 - C. severe Blood Deficiency
 - D. Blood Stasis (potentially)
-

10. Slippery-Short indicates:

- A. Phlegm-Heat with prevalence of Heat
 - B. severe Blood Deficiency with Empty-Heat
 - C. interior Cold
 - D. Dampness or Phlegm with Qi Deficiency
-

11. Long-Slippery indicates:

- A. Dampness with Liver-Qi Stagnation
 - B. Liver-Fire
 - C. Phlegm-Heat
 - D. Phlegm-Heat with prevalence of Heat
-

12. Slippery-Weak indicates:

- A. internal Cold, often chronic painful conditions
 - B. accumulation in the Interior
 - C. Dampness or Phlegm with Qi Deficiency
 - D. exterior Wind-Cold with prevalence of Wind
-

13. Fine-Wiry indicates:

- A. Liver-Qi Stagnation
 - B. loss of Essence or depletion of Blood
 - C. Heat in the Stomach
 - D. internal Heat
-

14. Choppy-Full indicates:

- A. Damp-Heat or Phlegm-Heat
 - B. Blood Stasis (potentially)
 - C. severe Yin Deficiency
 - D. Liver-Fire
-

15. Short-Choppy indicates:

- A. Heart-Qi Deficiency
 - B. collapse of Heart-Qi
 - C. interior Heat
 - D. severe Heart-Blood Deficiency with Empty-Heat
-

16. Deep-Rapid indicates:

- A. Deficiency of Qi and Phlegm
 - B. Yang Deficiency
 - C. interior Heat
 - D. Damp-Heat
-

17. Moving-Rapid indicates:

- A. Empty-Cold with Yang Deficiency
 - B. Heat
 - C. Yin Deficiency with exhaustion of Body Fluids and Empty-Heat
 - D. Phlegm-Heat
-

18. Wiry-Slow indicates:

- A. Heat
 - B. stagnation of Cold in the Liver channel
 - C. Blood Stasis from Cold
 - D. Summer-Heat invasion (floats MORE) vs. Yin Deficiency (floats less) — degree is the differentiator
-

19. Hurried-Overflowing indicates:

- A. Dampness in the Interior
 - B. Empty-Heat arising from Yin Deficiency
 - C. stagnation of Cold in the Liver channel
 - D. internal Cold, often chronic painful conditions
-

20. Overflowing-Deep indicates:

- A. Blood Stasis (potentially)
 - B. Deficiency of Qi and Phlegm
 - C. internal Heat
 - D. Blood Stasis from Cold
-

21. Full-Slow indicates:

- A. severe Blood Deficiency with Empty-Heat
 - B. Full-Cold
 - C. Qi and Blood stagnation; retention of food; internal Cold; internal Heat
 - D. Qi and Blood Deficiency with some Dampness
-

22. Hasty-Wiry indicates:

- A. Painful Obstruction (Bi) Syndrome
 - B. Liver-Fire and Heart-Fire
 - C. Full Liver pattern
 - D. Yang Deficiency
-

23. Firm-Choppy indicates:

- A. Yin Deficiency with Empty-Heat, or impending hemorrhage
 - B. Phlegm-Heat with predominance of Heat
 - C. Heart-Fire, Liver-Fire, and Phlegm-Heat
 - D. Blood Stasis
-

24. Choppy-Weak indicates:

- A. depletion of both Qi and Blood
 - B. Full Liver pattern
 - C. Yang Deficiency with some Dampness
 - D. severe Yang Deficiency with internal Cold
-

25. Choppy-Soggy indicates:

- A. Qi & Blood Deficiency with Dampness
 - B. invasion of Wind-Damp, or Wind complicated by Phlegm
 - C. Qi and Blood Deficiency with some Dampness
 - D. severe depletion of Blood
-

26. Rapid-Deep indicates:

- A. Liver disharmony (usually excess)
 - B. severe Qi & Blood Deficiency with internal Cold
 - C. invasion of Wind-Damp, or Wind complicated by Phlegm
 - D. interior Heat
-

27. Minute-Slow indicates:

- A. Liver-Fire or Liver-Yang rising
 - B. Yin Deficiency with Empty-Heat, or impending hemorrhage
 - C. Phlegm-Heat
 - D. severe Qi & Blood Deficiency with internal Cold
-

28. Slow-Wiry indicates:

- A. Damp-Heat
- B. loss of Essence or depletion of Blood
- C. Cold-Phlegm or Damp-Cold
- D. stagnation of Cold in the Liver channel

29. Leather-Rapid indicates:

- A. severe Deficiency of Yin with Empty-Heat
- B. Summer-Heat invasion (floats MORE) vs. Yin Deficiency (floats less) — degree is the differentiator
- C. weakness of the Wei Qi
- D. Heart-Fire, Liver-Fire, and Phlegm-Heat

30. Weak-Fine indicates:

- A. Wind-Cold invasion, prevalence of Cold
- B. severe Blood or Essence Deficiency
- C. severe Blood Deficiency
- D. retention of Phlegm

31. Slippery-Slow indicates:

- A. Deficiency of Qi and Phlegm
- B. Damp-Cold or Cold-Phlegm
- C. disease of the arteries, or hypertension
- D. Dampness in the Interior

32. Slow-Choppy indicates:

- A. Empty-Cold with Yang Deficiency
- B. Liver-Qi Stagnation
- C. Qi and Blood Deficiency
- D. Blood Deficiency and interior Cold

33. Scattered-Slow indicates:

- A. Shock
- B. severe Yin Deficiency
- C. Wind-Heat with intense Heat — can progress quickly to the Qi level
- D. severe Qi and Yang Deficiency

34. Rapid-Fine / Rapid-Floating indicates:

- A. Deficiency of Qi and Phlegm
- B. External Wind-Heat
- C. Blood Stasis (potentially)
- D. disease of the arteries, or hypertension

KEY Answer Key

#	Ans	Why
1	B	Overflowing-Slippery → Phlegm-Heat with prevalence of Heat
2	C	Slow-Weak → Empty-Cold with Yang Deficiency

#	Ans	Why
3	C	Slow-Slippery → Cold-Phlegm or Damp-Cold
4	C	Weak-Choppy → Blood Deficiency
5	C	Full-Long → Heat
6	B	Knotted-Choppy → Blood Stasis
7	C	Slow-Floating → exterior Wind-Cold with prevalence of Wind
8	B	Moving-Weak → Shock
9	B	Short-Slow → Yang Deficiency with internal Cold
10	D	Slippery-Short → Dampness or Phlegm with Qi Deficiency
11	C	Long-Slippery → Phlegm-Heat
12	C	Slippery-Weak → Dampness or Phlegm with Qi Deficiency
13	A	Fine-Wiry → Liver-Qi Stagnation
14	B	Choppy-Full → Blood Stasis (potentially)
15	A	Short-Choppy → Heart-Qi Deficiency
16	C	Deep-Rapid → interior Heat
17	B	Moving-Rapid → Heat
18	B	Wiry-Slow → stagnation of Cold in the Liver channel
19	B	Hurried-Overflowing → Empty-Heat arising from Yin Deficiency
20	C	Overflowing-Deep → internal Heat
21	B	Full-Slow → Full-Cold
22	B	Hasty-Wiry → Liver-Fire and Heart-Fire
23	D	Firm-Choppy → Blood Stasis
24	A	Choppy-Weak → depletion of both Qi and Blood
25	C	Choppy-Soggy → Qi and Blood Deficiency with some Dampness
26	D	Rapid-Deep → interior Heat
27	D	Minute-Slow → severe Qi & Blood Deficiency with internal Cold
28	D	Slow-Wiry → stagnation of Cold in the Liver channel
29	A	Leather-Rapid → severe Deficiency of Yin with Empty-Heat
30	C	Weak-Fine → severe Blood Deficiency
31	B	Slippery-Slow → Damp-Cold or Cold-Phlegm

#	Ans	Why
32	D	Slow-Choppy → Blood Deficiency and interior Cold
33	D	Scattered-Slow → severe Qi and Yang Deficiency
34	B	Rapid-Fine / Rapid-Floating → External Wind-Heat

PART E · Quiz 4 — Clinical Integration

Quiz 4 — Clinical Integration

30 questions — the hardest set.

- A patient has a Floating pulse but NO simultaneous aversion to cold with fever. Most likely:
 - Exterior Wind-Cold
 - Exterior Wind-Heat
 - Yin Deficiency
 - Full Heat
- Floating + Thin + Rapid with night sweats, five-palm heat and malar flush indicates:
 - Exterior Wind-Heat
 - Yin Deficiency with Empty-Heat
 - Summer-Heat
 - Full Heat
- You feel Floating + Empty. Which single feature separates Summer-Heat from Yin Deficiency here?
 - Rate
 - Degree of floating
 - Rhythm
 - Position
- A pulse is SLOW with randomly missed beats that resume immediately:
 - Hasty
 - Knotted
 - Intermittent
 - Moving
- A pulse is RAPID with random irregular stops:
 - Knotted
 - Intermittent
 - Hasty
 - Racing

6. A pulse pauses at REGULAR intervals. This is:

- A. Knotted — least serious
 - B. Hasty — moderate
 - C. Intermittent — most serious of the three
 - D. Moving
-

7. A patient in January has a wide, forceful pulse that fades gently. This is:

- A. Normal for the season
 - B. Flooding — a warning sign
 - C. Leather
 - D. Hollow
-

8. Which pulse is generally HEALTHY?

- A. Slow 遲
 - B. Slowed-Down/Moderate 緩
 - C. Soggy 濡
 - D. Fine 細
-

9. Sudden heavy blood loss would most likely produce:

- A. Wiry
 - B. Hollow
 - C. Firm
 - D. Tight
-

10. Severe Kidney-Essence and Kidney-Yin deficiency produces:

- A. Leather 革
 - B. Scattered 散
 - C. Hidden 伏
 - D. Moving 動
-

11. A pulse felt ONLY by pressing very heavily to the bone:

- A. Deep
 - B. Firm
 - C. Hidden
 - D. Weak
-

12. Wide, superficial, forceless, disappears under pressure, rate hard to count:

- A. Soggy
 - B. Scattered
 - C. Minute
 - D. Empty
-

13. A dancer reports stabbing fixed pain and purple lips. Which pulse fits best?

- A. Slippery
 - B. Choppy or Firm
 - C. Soggy
 - D. Hollow
-

14. Slippery + Rapid indicates:

- A. Cold-Phlegm
 - B. Damp-Heat or Phlegm-Heat
 - C. Wind-Phlegm
 - D. Qi Deficiency
-

15. Slippery + Slow indicates:

- A. Damp-Heat
 - B. Damp-Cold or Cold-Phlegm
 - C. Phlegm-Heat
 - D. Blood Stasis
-

16. Wiry + Slow indicates:

- A. Liver-Fire
 - B. Stagnation of Cold in the Liver channel
 - C. Liver-Yang rising
 - D. Blood Stasis
-

17. Deep + Wiry may indicate:

- A. Exterior Wind
 - B. Blood Stasis or a Chong Mai issue
 - C. Yin Deficiency
 - D. Summer-Heat
-

18. Choppy + Knotted indicates:

- A. Simple Blood Deficiency
 - B. Blood Stasis from Yang Deficiency and internal Cold
 - C. Phlegm-Heat
 - D. Wind invasion
-

19. Fine + Tight indicates:

- A. Empty-Cold with underlying Blood Deficiency
 - B. Full Heat
 - C. Damp-Heat
 - D. Liver-Fire
-

20. Minute + Wiry indicates:

- A. Liver-Yang rising with underlying Blood Deficiency
 - B. Liver-Fire
 - C. Cold in Liver channel
 - D. Blood Stasis
-

21. Overflowing + Tight indicates:

- A. Full Heat
 - B. Painful Obstruction (Bi) Syndrome
 - C. Phlegm-Heat
 - D. Yin Deficiency
-

22. Hasty + Fine without strength indicates:

- A. Heat in the Stomach
 - B. Collapse of Heart-Qi
 - C. Liver-Fire
 - D. Phlegm-Heat
-

23. A pulse like 'a bean bouncing in the vessel, no head or tail':

- A. Slippery
 - B. Moving 動
 - C. Tight
 - D. Firm
-

24. Tight + Firm indicates:

- A. Blood Stasis from Cold
 - B. Wind-Cold
 - C. Damp-Cold
 - D. Empty-Cold
-

25. Soggy + Rapid indicates:

- A. Damp-Heat
 - B. Damp-Cold
 - C. Blood Deficiency
 - D. Yang Deficiency
-

26. Which pair BOTH feel hollow beneath a firm surface?

- A. Soggy and Scattered
 - B. Hollow and Leather
 - C. Tight and Wiry
 - D. Fine and Minute
-

27. Short + Choppy indicates:

- A. Lung-Qi Deficiency
 - B. Heart-Qi Deficiency
 - C. Heart-Blood Deficiency
 - D. Yang Deficiency
-

28. Scattered + Floating indicates:

- A. Wind invasion
 - B. Severe Yuan Qi deficiency with floating Yang, or Yin Fire
 - C. Summer-Heat
 - D. Damp-Heat
-

29. Hurried/Racing beats how many times per breath?

- A. Over 5
 - B. Over 6
 - C. Over 7
 - D. Over 9
-

30. Slowed-Down + Soggy indicates:

- A. Dampness with Spleen-Qi Deficiency
- B. Cold-Dampness
- C. Blood Deficiency
- D. Wei Qi weakness

KEY Answer Key

#	Ans	Why
1	C	Losing the simultaneous chills+fever pairing rules out Exterior; Floating then points to Yin Def failing to anchor Yang.
2	B	Classic Empty-Heat from Yin Deficiency.
3	B	Summer-Heat floats MORE than the Floating-Empty of Yin Deficiency.
4	B	Knotted 結 – slow + irregular stops → Cold with Heart-Yang Deficiency.
5	C	Hasty 促 → severe Heat, Heart-Qi Deficiency, Heart-Fire.
6	C	Intermittent 代 flags a serious internal organ / Heart problem.
7	B	Flooding belongs to summer; in winter it signals excess Yang – Schrier's cerebral haemorrhage case.
8	B	Huǎn 緩 – 4 beats/breath, faster than Slow.
9	B	Hollow 芤 – scallion stalk, edges felt, centre obscure. Hemorrhage.
10	A	Leather – drum surface, thick on top, hollow beneath.
11	C	Hidden 伏 – severe Yang Deficiency.
12	B	Scattered 散 – blossoms scattering; serious condition.
13	B	Blood Stasis → Choppy-Full or Firm/Confined 牢.
14	B	Slippery=Damp/Phlegm, Rapid=Heat.
15	B	Slow=Cold.
16	B	Wiry=Liver, Slow=Cold.
17	B	Per Schrier's Deep combinations slide.
18	B	Combination on the Choppy slide.
19	A	Fine=Blood Def, Tight=Cold.
20	A	From the Minute combinations slide.
21	B	Listed explicitly on the Overflowing slide.
22	B	The most serious Hasty combination.

#	Ans	Why
23	B	Moving — Shock, anxiety, fright; Pain.
24	A	On the Tight combinations slide.
25	A	Soggy=Damp+Def, Rapid=Heat.
26	B	Hollow=scallion, Leather=drumskin — both hollow beneath.
27	B	Short-Floating=Lung-Qi; Short-Choppy=Heart-Qi.
28	B	From the Scattered combinations slide.
29	C	More than seven per breath, 140–180 bpm — Fire exhausting Yin.
30	A	From the Huǎn combinations slide.

PART F · Midterm Bridge — Weeks 1–3

Purpose

Weeks 1–3 do not sit in separate boxes on the midterm. This set forces you to carry Vital Substances and Eight Principles forward into pulse reasoning.

Week 1 → 3

1. A patient shows Qi Deficiency signs plus cold. Per Schrier's formula, this is:

- A. Yin Deficiency
- B. Yang Deficiency
- C. Blood Deficiency
- D. Blood Stasis

Week 1 → 3

2. Blood Deficiency signs plus heat indicates:

- A. Yang Deficiency
- B. Yin Deficiency
- C. Qi Stagnation
- D. Damp-Heat

Week 2 → 3

3. Exterior patterns are confirmed by:

- A. Fever alone
- B. Aversion to cold alone
- C. Fever AND aversion to cold simultaneously + Floating pulse
- D. A Deep pulse

Week 2 → 3

4. Deficiency vs. Excess is differentiated primarily by:

- A. Pulse rate
 - B. Response to pressure
 - C. Tongue coating
 - D. Time of day
-

Week 2 → 3

5. Full Heat vs. Empty Heat on the tongue:

- A. Both have coating
 - B. Full = coating present; Empty = no coating (peeled)
 - C. Empty = thick yellow coat
 - D. Neither has coating
-

Week 2 → 3

6. True Heat / False Cold presents with cold limbs BUT:

- A. Pale wet tongue
 - B. Deep FORCEFUL pulse, thirst for cold drinks, dark urine
 - C. Clear urine
 - D. No thirst
-

Week 2 → 3

7. True Cold / False Heat presents with malar flush BUT:

- A. Deep forceful pulse
 - B. Floating-EMPTY pulse, wants to cover up, prefers warm drinks
 - C. Yellow coat
 - D. Dark urine
-

Week 1 → 3

8. Blood Stasis classically pairs with which pulses?

- A. Slippery or Soggy
 - B. Choppy, Firm, or Wiry
 - C. Fine or Minute
 - D. Huǎn
-

Week 1 → 3

9. Qi Stagnation most classically produces:

- A. Slippery
 - B. Wiry
 - C. Soggy
 - D. Hollow
-

Integration

10. A dancer has Wiry pulse, red tongue sides, irritability, frequent sighing. Best pattern:

- A. Blood Deficiency
 - B. Liver-Qi Stagnation
 - C. Damp-Heat
 - D. Yang Deficiency
-

Integration

11. Slippery + Rapid + sticky yellow coat + heavy limbs:

- A. Cold-Damp
- B. Damp-Heat
- C. Blood Stasis
- D. Yin Deficiency

Integration

12. Which single finding most argues AGAINST an Exterior diagnosis?

- A. A Floating pulse
- B. Absence of simultaneous chills and fever
- C. Occipital stiffness
- D. Sore throat

KEY Answer Key

#	Ans	Why
1	B	Yang def = Qi deficiency signs + cold. Expect Deep-Weak or Slow-Weak.
2	B	Yin def = Blood deficiency signs + heat. Expect Floating-Thin-Rapid or Fine-Rapid.
3	C	The simultaneity is the confirmation — and it's what the Floating pulse tracks.
4	B	Deficiency relieved by pressure; Excess aggravated. Pulse strength corroborates.
5	B	Pulse corroborates: Full-Rapid-Overflowing vs. Floating-Empty-Rapid.
6	B	Pulse strength at depth is the tiebreaker when limbs mislead.
7	B	Floating-Empty here is deficiency-driven, not Exterior.
8	B	Choppy-Full, Firm/Confined, Deep-Wiry all carry Blood Stasis.
9	B	Wiry — Liver fails to ensure smooth flow.
10	B	Wiry + Liver signs. Confirm with inquiry into frustration/tension.
11	B	Slippery=Damp, Rapid=Heat, coating confirms.
12	B	Once simultaneity is gone, the pathogen has moved Interior.

PART G · In-Class Palpation Practice

This one needs another person — and that is the point

Every other document in this kit works alone. Palpation does not: you cannot learn to discriminate pulses by feeling only your own. Schrier runs this in class as paired practice, so use it there. 12 minutes per role, then switch — one Practitioner, one Patient. Narrate aloud; verbalising is what makes it stick.

1 Setup — 2 min

- **Ask permission before touching.** Every time. "May I feel your pulse?"
- Patient seated, forearm supported, wrist at roughly heart level, palm up.
- Practitioner: your right hand reads their left wrist; your left hand reads their right wrist. If seated opposite, it reverses.
- Settle first. If either of you just climbed stairs or walked in from outside, wait. Note the time of day.

Schrier's framing

"Be in a mode of curiosity. You are a beginner." Also: pulses shift — by the last person in a rotation, the pulse has already changed. That is expected, not failure.

2 The Six-Step Sequence — narrate each aloud, 6 min

Step	Say out loud
① Pulse as a whole	"Overall this feels..."
② Spirit / Stomach-Qi / Root	"Does it have 胃神根? Is there root at the Chǐ?"
③ Three levels + positions	"At the superficial... at the middle... at the deep..."
④ Strength	"Forceful or forceless, and where?"
⑤ Overall quality	"If I had to name one quality it would be..."
⑥ Individual position quality	"Left Cùn feels... right Guān feels..."

3 Confirm With Questions — 3 min

Don't guess in silence — corroborate

If you think RAPID: ask about thirst, heat sensation, sweating; look for red tongue / yellow coat.

If you think SLOW: ask whether they run hot or cold; feel their hands and forearms.

If you think SLIPPERY: ask about heaviness, muzziness, appetite, recent meals — and if relevant, ask "*are you trying to conceive?*", never "*are you pregnant?*"

If you think WIRY: ask about stress, frustration, sighing, hypochondriac tension.

4 Week 3 Scope — 1 min

Only these five today

Schrier's instruction: **Floating, Deep, Slow, Rapid, Full**. Don't chase Wiry or the rarer qualities yet. Find these five reliably first.

5 Record Sheet

Partner / time	L Cùn	L Guān	L Chǐ	R Cùn	R Guān	R Chǐ	Overall quality

6 Debrief — 2 min

- What did you both agree on?
- Where did you disagree — and what would settle it?
- What did you feel that you could not name?
- What goes on the Clarifying Record for Schrier?
