

# Week 9 Cram Sheet

## Night-Before Recall + Quick Reference

Lecture 9 (Final Lecture) · Daniel Schrier, D.O.M., L.Ac. · Topics: Inquiry continued (Limbs–Children) & Diagnosis by Hearing & Smelling — 聞診 (Wén Zhén)

**Study Order** — PART I: 1) Limbs 2) Sleep 3) Sweating 4) Ears/Eyes 5) Cold/Heat/Fever 6) Emotions 7) Sexual 8) Women's 9) Children's. PART II: 10) Voice/Zang-Fu 11) Voice patterns 12) Breathing 13) Cough/reflexive 14) Vomit/belch/hiccup 15) Borborygmi/yawn/sigh 16) 5 Element Sounds 17) 6 Healing Sounds 18) Smelling framework 19) 5 Odors 20) Secretion odors.

### PART I · Inquiry Continued (Q8–16)

| 1 · Limbs                        |                                                                 |
|----------------------------------|-----------------------------------------------------------------|
| Finding                          | Pattern                                                         |
| Tingling                         | Blood deficiency                                                |
| Numbness, unilateral             | Wind or Wind-Phlegm                                             |
| Heaviness/swelling               | Dampness                                                        |
| Pain                             | Qi or Blood Stagnation                                          |
| Joint pain: wanders, sore/aching | Wind                                                            |
| Joint pain: fixed, worse w/ cold | Cold                                                            |
| Joint pain: heavy/aching/swollen | Dampness                                                        |
| Joint pain: red/swollen/heavy    | Damp-Heat                                                       |
| Atrophy/Flaccidity: early        | ST/SP-Qi deficiency                                             |
| Atrophy/Flaccidity: late         | LV/KI-Yin def. or SP/KI-Yang def.                               |
| Tremors                          | Liver-Wind (excess or deficiency type)                          |
| Cold hands                       | Yang def. or Heart-Blood def.                                   |
| Cold hands + palpitations/dizzy  | Heart-Blood deficiency                                          |
| Cold fingertips especially       | Liver-Qi stagnation                                             |
| Cold feet                        | KI-Yang def. or LV-Qi stagnation (women: LV-Blood def.)         |
| Weak knees                       | Kidney deficiency, esp. Kidney-Yang                             |
| Heaviness (general)              | Dampness (±Heat/Cold); SP+ST-Qi def. → heaviness in all 4 limbs |

### 2 · Sleep

Sleep depends on Blood & Yin, esp. Heart & Liver (Spleen has influence too). Mind/Shen + Hun must be anchored by HT/LV Blood.

| Finding                                                          | Pattern                                          |
|------------------------------------------------------------------|--------------------------------------------------|
| Can't fall/stay asleep                                           | Blood def. not anchoring Shen/Hun (Empty)        |
| Restless, hot, agitated, excess dreaming                         | Pathogens agitating Shen/Hun out of Blood (Full) |
| Difficulty falling asleep                                        | Blood deficiency (usually HT, can be LV/SP)      |
| Waking many times at night                                       | Yin def. with Empty Heat (HT/LV/KI)              |
| Waking early, can't return to sleep                              | Gall Bladder deficiency                          |
| Insomnia + anxiety, dream-disturbed, Qi/Blood signs              | HT and SP Blood deficiency                       |
| Insomnia + difficulty falling asleep, dizzy, blurred vision      | Liver-Blood deficiency                           |
| Insomnia, waking freq., excess dreams, night sweat, palpitations | HT and KI-Yin def. with Empty-Heat               |
| Dream-disturbed sleep (isolated)                                 | Liver-Fire or Heart-Fire                         |
| Restless sleep, excess dreams                                    | Retention of food                                |

Quick Recall: FALLING asleep=Heart Blood. DREAMING=Liver. WAKING repeatedly=Yin deficiency/Empty Heat.

**Heads Up** — Dream-symbolism material (Nèijīng passages, Po/Hun/Shen dream categories) is explicitly "not tested" per Schrier's own slide. Skip drilling it.

### 3 · Sweating

| Finding                            | Pattern                            |
|------------------------------------|------------------------------------|
| Full conditions                    | Heat, or Damp-Heat                 |
| Empty conditions                   | Yang deficiency, or Yin deficiency |
| Only on head                       | ST Heat, or Damp-Heat              |
| Oily sweat on forehead             | Collapse of Yang                   |
| Only arms/legs                     | ST and SP deficiency               |
| Only hands                         | Lung-Qi or Heart-Qi deficiency     |
| Whole body                         | Lung-Qi deficiency                 |
| Palms/soles/chest (5-palm heat)    | Yin deficiency                     |
| Daytime sweating                   | Yang deficiency                    |
| Night sweating                     | Yin deficiency (occ. Damp-Heat)    |
| Profuse cold sweat, severe illness | Collapse of Yang                   |
| Oily, pearl-like on forehead       | Collapse of Yang — imminent death  |
| Yellow sweat                       | Damp-Heat                          |

4 • Ears and Eyes

| Finding                          | Pattern                                                          |
|----------------------------------|------------------------------------------------------------------|
| Tinnitus/Deafness: sudden onset  | Full — LV-Fire, LV-Yang rising, LV-Wind                          |
| Tinnitus/Deafness: gradual onset | Empty — Kidney def. (deafness also: HT-Blood or Upper Burner Qi) |
| Noise worse w/ pressure          | Full                                                             |
| Noise better w/ pressure         | Empty                                                            |
| High-pitch (whistle/cicada)      | LV-Yang, LV-Fire, LV-Wind                                        |
| Low-pitch (rushing water)        | Kidney deficiency                                                |
| Eye pain/swelling/redness        | Wind-Heat invasion, or Liver-Fire                                |
| Feeling of pressure in eyes      | Kidney-Yin deficiency                                            |
| Blurred vision + floaters        | LV-Blood, LV-Yin, or KI-Yin def.                                 |
| Blurred vision + photophobia     | LV-Blood def., or LV-Yang rising                                 |
| Dry eyes                         | Liver and/or Kidney-Yin deficiency                               |

5 • Cold, Heat & Fever

| Finding                                         | Pattern                                                 |
|-------------------------------------------------|---------------------------------------------------------|
| Interior: feeling cold or hot                   | Direct sign of interior pattern                         |
| Exterior: simultaneous aversion to cold + fever | Key sign of EPF invasion — Tai Yang / Wei level         |
| Feeling of heat in exterior-origin disease      | Pathogen has entered the Interior                       |
| Alternating cold & heat                         | Shao Yang stage (GB/TH) / GB Heat at Qi level           |
| Fever intensity depends on                      | Zheng Qi vs. EPF struggle — NOT Wind-Cold vs. Wind-Heat |
| Both Zheng Qi & EPF strong                      | High "fever"                                            |
| Both weak                                       | Low "fever"                                             |
| One strong, one weak                            | Medium "fever"                                          |
| Cold limbs + abdomen                            | SP-Yang / ST-Yang deficiency                            |
| Cold hands/feet, esp. fingers                   | Liver-Qi stagnation                                     |
| Cold hands + chest                              | HT-Blood def., or Yang deficiency                       |
| Cold legs/knees/feet/back                       | Kidney-Yang deficiency                                  |
| Heat in afternoon/evening                       | Empty-Heat / Yin deficiency                             |
| Constant low-grade temp                         | Damp-Heat (Damp blocks full venting)                    |
| Fever mid-night                                 | Yin deficiency                                          |

**Heads Up** — Classic trap: fever severity tracks the Zheng Qi/EPF STRUGGLE, not whether the pathogen is Wind-Cold or Wind-Heat.

6 • Emotional Symptoms

Heart alone "knows" emotion (houses Shen) — hence red tongue TIP often shows regardless of which emotion/organ is primary.

| Finding                                                         | Pattern                                  |
|-----------------------------------------------------------------|------------------------------------------|
| Depression + insomnia/palpitations/tired/weak limbs/loose stool | SP and HT-Blood deficiency               |
| Depression + cold hands, palpitations                           | Heart-Yang deficiency                    |
| Depression + lack of direction/sadness                          | Liver-Blood deficiency                   |
| Depression + anxiety, night sweat, red tongue no coat           | KI/HT-Yin def. with Empty-Heat           |
| Depression + no motivation, cold, weak knees                    | Kidney-Yang deficiency                   |
| Depression (full) moody/irritable                               | Liver-Qi stagnation                      |
| + red tongue                                                    | Stagnant LV-Qi → Heat                    |
| + lump in throat                                                | LV-Qi stagnation w/ Qi-Phlegm (Plum-Pit) |
| + palpitations/agitation/phlegm/swollen tongue                  | Phlegm-Fire harassing the Mind           |
| + purple tongue                                                 | Heart-Blood stasis                       |
| Anxiety (empty): insomnia/palpitations                          | Heart-Blood deficiency                   |
| Anxiety worse evening, palp., night sweat                       | Heart-Yin deficiency                     |
| Anxiety + depression/insomnia/blurred vision                    | Liver-Blood deficiency                   |
| Anxiety + tongue no coat                                        | Liver-Yin deficiency                     |
| Anxiety worse evening + no willpower/dizzy/tinnitus             | Kidney-Yin deficiency                    |
| Anxiety + insomnia/timidity                                     | HT and GB-Qi deficiency                  |
| Anxiety (full) + hypochondrial distention                       | Liver-Qi stagnation                      |
| + temple headache/tinnitus/deaf/dizzy/blurred vision            | Liver-Yang rising                        |
| + anger outbursts/red eyes/bitter taste/dark urine              | Liver-Fire                               |
| + mouth ulcers/red face/dark urine, red tongue+coat             | Heart-Fire                               |
| + stabbing chest pain → inner left arm (“heart attack”)         | Heart-Blood stasis                       |
| + manic behavior/mental confusion/swollen tongue                | Phlegm-Fire harassing the Mind           |
| Worry/overthinking + loose stools                               | Heart and Spleen Qi deficiency           |
| Worry + cough/weak voice                                        | Lung-Qi deficiency                       |
| Worry + palpitations, pale/thin tongue                          | Heart-Blood deficiency                   |
| Worry increases after period (women)                            | Liver-Blood deficiency                   |
| Sadness/grief + breathlessness/dislike speaking                 | Lung and Heart-Qi deficiency             |
| + mental confusion/aimlessness                                  | Liver-Blood deficiency                   |
| + dream-disturbed/startles easily                               | Heart-Blood deficiency                   |

Quick Recall: same short root list recurs across Depression/Anxiety/Worry/Grief — HT-Blood, LV-Blood, SP-Qi, Lung-Qi, KI/HT-Yin w/ Empty-Heat, LV-Qi stagnation. Learn the roots once.

| 7 • Sexual Symptoms                                   |                                                                |
|-------------------------------------------------------|----------------------------------------------------------------|
| Finding                                               | Pattern                                                        |
| Impotence + cold/backache/clear urine                 | Kidney–Yang deficiency                                         |
| Impotence + dizzy/palpitations/choppy pulse           | Heart–Blood deficiency                                         |
| Impotence + insomnia/rapid overflowing pulse          | Heart–Fire                                                     |
| Heavy scrotum + urethral discharge/sticky yellow coat | Damp–Heat in Liver channel                                     |
| Lack of libido (men)                                  | KI–Yang/Qi def., SP def., HT def., Lung def., LV–Qi stagnation |
| Premature ejaculation                                 | KI–Qi not firm, HT–Qi def., or HT–Blood def.                   |
| Tired/dizzy after ejaculation                         | Deficiency of the Kidneys                                      |
| Lack of libido / can't orgasm (women)                 | Kidney or Heart deficiency, KI–Yang deficiency                 |
| Excessive sexual desire                               | Liver or Heart–Fire, Empty–Heat from KI–Yin def.               |
| Headache after orgasm                                 | Rebellious Chong Mai Qi, or Heart–Fire                         |

**Heads Up** — Younger men w/ premature ejaculation → think Heart (settling/performance anxiety). Older men → think Kidney. Sexual-symptom mechanisms are the same for men and women even where Maciocia only lists one under "Women."

| 8 • Women's Health                           |                                                                        |
|----------------------------------------------|------------------------------------------------------------------------|

| Infrequent, weak/no sound                                                                                                                                                                                                              |                                                                 | SP/KI Yang deficiency                                                                       |                        |

**Sighing:** LV or Lung Qi stagnation. LV=repressed anger/frustration. Lung=worry & sadness. Weak sound alt. root=SP/HT deficiency (sadness/grief/pensiveness).

Quick Recall: Vomiting/belching/hiccup all = Rebellious ST Qi. Loud/forceful=Excess-Heat or LV invading ST.

| 15 · Five Element Sounds 五音 |       |         |
|-----------------------------|-------|---------|
| Element                     | Sound | Pinyin  |
| Wood                        | Shout | Hū 呼    |
| Fire                        | Laugh | Xiào 笑  |
| Earth                       | Sing  | Chàng 唱 |
| Metal                       | Weep  | —       |
| Water                       | Groan | —       |

Quick Recall: Shout-Wood, Laugh-Fire, Sing-Earth, Weep-Metal, Groan-Water.

| 16 · Six Healing Sounds |               |                                      |
|-------------------------|---------------|--------------------------------------|
| Sound                   | Organ         | Effect (1-liner)                     |
| Xū 嘘                    | Liver         | Removes heat, brightens eyes         |
| Hē 呵                    | Heart         | Expels heat, reduces fire            |
| Hū 呼                    | Spleen        | Drives out heat, strengthens SP      |
| Sì 呬                    | Lung          | Calms qi, moistens lungs             |
| Chuī 吹                  | Kidney        | Removes wind-cold, urges stagnant qi |
| Xī 嘻                    | Triple Burner | Clears heat/restlessness, emotions   |

**Heads Up** — Hū 呼 = both "Shout" (Wood voice sound) AND "Spleen" Healing Sound. Same hanzi, two different tables — don't conflate.

| 17 · Diagnosis by Smelling — Framework |                                               |
|----------------------------------------|-----------------------------------------------|
| Aspect                                 | Tells You                                     |
| Body odor itself                       | Pattern of disharmony AND constitutional type |
| Odor of secretions                     | Nature of the pattern of disharmony only      |

Quick Recall: General rule — strong/foul/rotten = Heat/Excess. Absent/fishy = Cold/Deficient.

| Body Odor       | Pattern                                |
|-----------------|----------------------------------------|
| Goatish         | Wind, damp, heat accumulation          |
| Foul, stinking  | Epidemic disease, or summer heat toxin |
| Foul, in armpit | Damp-heat accumulation                 |

| 18 · The Five (Named) Odors |                                                   |
|-----------------------------|---------------------------------------------------|
| Odor                        | Descriptor                                        |
| Rancid (Sǒu 餿)              | Fat no longer fresh, mown grass, unpleasant       |
| Scorched                    | Burnt toast, dryer-warm clothes, scorched ironing |
| Fragrant (Xiāng 香)          | Cloying, sickly sweet — NOT actually pleasant     |
| Rotten (Làn 爛)              | Rotting meat / garbage truck                      |
| Putrid (Fǔ 腐)               | Rotting meat / stagnant pond / stale urine        |

**Heads Up** — These 5 odor slides do NOT explicitly label a Zang-Fu element per odor (unlike Five Element Sounds). "Scorched" slide reuses xiào 笑 (same hanzi as Laughing) — likely a copy/paste error; classical scorched is jiāo 焦. Confirm with Prof. Schrier.

| 19 · Odor of Bodily Secretions            |                                                                                            |                                     |
|-------------------------------------------|--------------------------------------------------------------------------------------------|-------------------------------------|
| Secretion                                 | Foul/Strong →                                                                              | Fishy/Odorless →                    |
| Breath                                    | ST Heat/food retention (sour=food retention; pungent=Damp-Heat SP/ST; rotten=Damp-Heat LI) | Fishy=Phlegm-Heat Lung              |
