

How to Use This Kit

EAM310 · Cumulative Final Exam Prep · VUIM Summer 2026

Prof. Daniel Schrier, D.O.M., L.Ac. | Final: Friday, Sept. 11, 2026
Compiled by Jon (GTA) for EAM310 classmates

Read This First

This kit was built for the whole class, not just for me. Everything in it traces back to Schrier's slides and lecture transcripts, cross-checked against Maciocia (FCM) and Cheng Xinnong (CAM). Where something is a judgment call or an open question, it's flagged — not smoothed over.

What's in the Kit

Document	What it's for	When to use it
Study Guide	Full-depth reference. Tables and diagrams for every diagnostic category, organized by exam type (Look/Ask/Feel/Listen-Smell) and by week.	First pass through material, or when a Quiz/Drill question stumps you and you need the "why."
Cram Sheet	Condensed, high-density recall tables. One page per major topic, "Quick Recall" one-liners, gold Heads-Up boxes for the traps.	Night before, morning of, or any time you have 15 minutes and need maximum review per minute.
Drill Pack	Short-answer and fill-in drills that force active recall rather than recognition.	After you've read the Study Guide once — this is where the material actually sticks.
Quiz Pack	Multiple-choice, formatted like Schrier's actual quizzes.	Timed self-testing. Treat it like the real thing.
EXCEPT/NOT Pack	Practice with the "which of the following is NOT/EXCEPT" question format specifically, since that format trips people up independent of content mastery.	Once content feels solid — this tests the format, not just the facts.

Two Versions of the Depth-Heavy Documents

The Study Guide and Cram Sheet come in two versions. Pick the one that matches how you've been reviewing all summer:

Version	Coverage	Best for
Full Cumulative	Weeks 1–9, equal depth throughout.	If you want one complete reference and haven't been reviewing Weeks 1–5 recently.
6–9 Deep + 1–5 Review	Weeks 6–9 (the Four Examinations: Observation, Inquiry, Palpation, Hearing & Smelling) in full depth; Weeks 1–5 condensed to core recall tables.	If Weeks 1–5 (Vital Substances, 8 Principles, Pulse, Tongue, Midterm material) already feel solid and you want to spend most of your remaining time on the newer material.

Heads up: the Four Examinations (Weeks 6–9) are the most recently taught and least reviewed material in the class — budget extra time there regardless of which version you pick.

Print vs. reMarkable Editions

Print	White background, minimal color, no branding — built for actually printing and marking up with a pen. No dance-medicine content, so it's neutral for sharing with the whole class.
reMarkable	Full digital layout for the reMarkable Paper Pro, darker ruled lines for e-ink visibility, and includes my "TCM for Ballroom Dancers" clinical-connection callouts where relevant — those are optional flavor, not exam content.

Suggested Plan — 5 Days to Sept. 11

Day	Focus
Today (Sat)	Skim the Cram Sheet cover-to-cover once, cold, to see where the real gaps are. Don't stop to fix them yet — just notice them.
Sun	Study Guide, Weeks 6–9 (Four Examinations). This is the newest, least-reviewed material — front-load it.
Mon	Drill Pack, Weeks 6–9. Then a fast Study Guide pass on Weeks 1–5 to refresh Pulse, Tongue, and 8 Principles.
Tue	Full Quiz Pack, timed. Review every miss against the Study Guide — don't just re-read the right answer, understand why the wrong ones are wrong.
Wed	EXCEPT/NOT Pack + second Cram Sheet pass. Sleep is worth more than one more hour of drilling tonight.
Thu (day before)	Cram Sheet only. Light review, confidence-building, early to bed.

Open Flags — Confirm with Prof. Schrier Before the Final

- 1. Scorched odor character:** the Week 8/9 materials use 笑 (xiào) on the "Scorched" odor slide where the classical character is 焦 (jiāo). Flagged for confirmation, not corrected silently — check the current slide before the final.

2. Five Named Odors ↔ Zang-Fu pairing: the source slides don't explicitly pair each of the five odors to a Zang-Fu organ. If Schrier confirms a pairing in review, it isn't yet reflected in this kit.

Where everything lives: the full, current kit is always at jc09170307.github.io/EAM310-Study-Kit
