1 Positions · Method · Normal

SIX POSITIONS?

L: Cùn=HT(SI) · Guān=LR(GB) · Chǐ=KD(BL) | R: Cùn=LU(LI) · Guān=SP(ST) · Chǐ=PC(TB)

FIVE FINGER MOVEMENTS?

Lifting (superficial) · Pressing (deep) · Searching (rate) · Pushing (shape) · Rolling (length). Maciocia box lists 4 — know all 5.

NORMAL PULSE — 胃神根?

胃 Wèi = flowing/gentle · 神 Shén = strong/rhythmical · 根 Gēn = rooted, deep at Chǐ

NORMAL RATE?

4–5 beats per breath, 60–90bpm. Counted against the PRACTITIONER's breath.

8 COMPONENTS OF A NORMAL PULSE?

Width · Depth · Rate · Rhythm · Strength · Length · Tension · Shape

2 Seasonal — Trap Territory

ALL FOUR SEASONAL PULSES?

Spring=Wiry 弦 (Feb 4–May 4) · Summer=Flooding 洪 (May 5–Aug 6) · Autumn=Hair-like 毛 (Aug 7–Nov 6) · Winter=Stone 石 (Nov 7–Feb 3)

WHEN IS A SEASONAL PULSE ABNORMAL?

When other signs/symptoms accompany it. Flooding in WINTER = warning sign (Schrier's cerebral hemorrhage case), not a seasonal variant.

3 The Core Combinations

FLOATING + ?

Tight=Ext Wind-Cold · Rapid=Ext Wind-Heat · Empty=Summer-Heat OR Yin Def (degree differentiates) · Slippery=Wind-Damp/Phlegm · Weak=External-Empty, weak Wei Qi

DEEP + ?

Slow=Int Cold · Rapid=Int Heat · Weak=Yang Def · Wiry=Blood Stasis/Chong Mai · Soggy-Slow=Int Dampness

SLOW + ?

Weak=Empty-Cold/Yang Def · Full=Full Cold (chronic pain) · Choppy=Blood Def + Int Cold · Slippery=Cold-Phlegm · Wiry=Cold in Liver channel

RAPID + ?

Full=Full Heat · Empty=Empty Heat (Yin Def) · Wiry=Liver Fire · Slippery=Phlegm-Heat · Overflowing=Full Heat

4 ▲ The Traps

FLOATING ≠ ALWAYS EXTERIOR

Also Yin Deficiency — Yin fails to anchor Yang. Presents Floating+Thin+Rapid with night sweats, five-palm heat, malar flush, dry throat worse at night. **Differentiator:** true Exterior floating has SIMULTANEOUS aversion to cold + fever. Lose that pairing → pathogen moved Interior.

HUǍN IS THE HEALTHY ONE

Slowed-Down/Moderate 緩 = 4 beats/breath, faster than Slow = **generally a healthy pulse**. The only qualitatively normal entry among the 28. Easy to misread as Slow.

IRREGULAR RHYTHM — THE THREE-WAY SPLIT

Knotted 結 = SLOW + random stops → Cold w/ Heart-Yang Def. **Hasty** 促 = RAPID + random stops → Severe Heat / Heart-Fire. **Intermittent** 代 = pauses at REGULAR intervals → most serious; internal organ / Heart problem.

Dance Quick-Hit

Wiry = the competitive dancer's default. Check Liver-Qi Stagnation from frame tension before assuming emotional aetiology.

PART B · Quick Reference — Carry This

One job: name it, place it, say what it means.

Fold or print double-sided and carry it. This is the whole 28 compressed to the minimum that still lets you answer a question. Use the Workbook when you need depth; use this when you need speed.

1 The 28 — Minimum Viable Version

#	Char	Tell	Means
1. Floating	浮 Fú	Wood floating on the surface of water; a subtle breeze across a bird's back; scallion leaves rolled lightly between the fingers.	Invasion of external Wind.
2. Deep / Submerged	沉 Chén	A stone thrown into a well, sinking to the bottom.	Pathogenic factor in the Interior (Deep-Full).

#	Char	Tell	Means
3. Slow	遲 Chí	Fewer than three beats per breath, about 40–60bpm, regular rhythm.	Cold pattern.
4. Rapid	數 Shuò	Over five beats per breath, 90–140bpm, regular rhythm.	Heat pattern.
5. Empty / Deficient	虛 Xū	A water balloon — big on the outside, nothing solid when you press in.	Qi Deficiency.

3 The Five You Must Own First

Schrier's Week 3 instruction — literally

"Don't worry about wiry. We haven't gotten there. **Only floating, deep, slow, rapid, full.** Work with each other. Start noticing." Everything else on this sheet is for the written exam. These five are for your fingers.

Pulse	What you're feeling for	Confirm by asking
Floating	Meets you at the surface; press and it dips, release and it bounces back up	Chills + fever together? Stiff neck? Stuffy nose?
Deep	Nothing at the top; only appears near the bone	Do you run cold? Chronic or recent?
Slow	Under 3 beats per your breath	Do you generally run cold? Feel their hands and forearm.
Rapid	Over 5 beats per your breath	Thirsty? Feeling of heat? Easy to break a sweat? Red tongue / yellow coat?
Full	Forceful at all three depths and all three positions	Is anything aggravated by pressure?

4 Three Traps

Trap	Correction
Floating = Exterior	Also Yin Def. Exterior needs simultaneous chills + fever. No pairing → look at Yin Def.
Slow-looking = Slow	Count it. 4 beats/breath is Huǎn — healthy , not Slow (under 3).
Irregular = irregular	Three different pulses. Slow+random = Knotted. Rapid+random = Hasty. Regular pauses = Intermittent (most serious).

Floor-side version

In a studio you'll mostly meet Wiry (frame tension), Rapid (post-exertion — wait and re-take), and Deep/Weak (late-season depletion). Learn to wait out the exertion pulse before reading anything.
