

EXCEPT / NOT Question Pack

18 Negative-Format Questions — Full Answer Key

Week 8 · Diagnosis by Hearing & Smelling — 聞診 · Lecture 8

Print Edition

How to use this pack: Negative-format questions ("All of the following EXCEPT...") are where students lose points even when they know the material — one wrong-in-context option hides among three correct ones. For each question, mark every option T (true/belongs) or F (false/doesn't belong) before picking your final answer — don't just scan for "the weird one."

EXCEPT / NOT Questions

1. All of the following are governed by the organs listed for the voice EXCEPT:

- A. Lung governs production of the voice
- B. Kidney governs volume of the voice
- C. Spleen & Stomach govern strength of the voice
- D. Liver governs the pitch of the voice

T/F each: A ___ B ___ C ___ D ___

2. All of the following indicate a Full or Heat pattern of the voice EXCEPT:

- A. Loud voice
- B. Excessive talking
- C. Sudden loss of voice from Wind-Heat invasion
- D. Reluctance to talk

T/F each: A ___ B ___ C ___ D ___

3. All of the following describe hoarseness patterns EXCEPT:

- A. Sudden onset, low pitch, raspy = Exterior syndrome
- B. Chronic, gradual intensity = Blood stagnation
- C. Plum-pit sensation with cough = Phlegm-Heat
- D. Chronic, worse in the morning = Lung and Kidney Yin deficiency

T/F each: A ___ B ___ C ___ D ___

4. All of the following are true of Respiration patterns EXCEPT:

- A. Excess/Heat = loud sound, rough/distressed breath, acute onset
- B. Empty/Cold = low sound, faint/slow breath, slow onset
- C. Excess/Heat is seen with phlegm-heat invading the Lung
- D. Empty/Cold is seen with a surplus of external contraction of evil qi

T/F each: A ___ B ___ C ___ D ___

5. All of the following are Abnormal Respiration types with their correct mechanism EXCEPT:

- A. Asthma — Lung qi's failure to descend
- B. Wheezing — Lung qi fails to descend with phlegm obstruction
- C. Upper Stifling — Lung qi rises upward to throat, obstructs air tract
- D. Shortness of Breath — Excess Heart fire flooding the Lung

T/F each: A ___ B ___ C ___ D ___

6. All of the following indicate a Full/Excess presentation EXCEPT:

- A. Loud, explosive cough
- B. Loud and long belching sound
- C. Sudden, forceful vomiting sound
- D. Quiet, low hiccup sound

T/F each: A ___ B ___ C ___ D ___

7. All of the following are true of Borborygmi, Yawning, and Sighing EXCEPT:

- A. Loud borborygmi is usually accompanied by diarrhea or dysentery
- B. Frequent, loud yawning relieved after yawning indicates Liver Qi Stagnation
- C. Infrequent, weak yawning indicates Spleen/Kidney Yang deficiency
- D. Sighing always indicates Kidney Yin deficiency

T/F each: A ___ B ___ C ___ D ___

8. All of the following are correctly paired Five Element Sounds EXCEPT:

- A. Wood — Shouting
- B. Fire — Laughing
- C. Earth — Groaning
- D. Metal — Weeping

T/F each: A ___ B ___ C ___ D ___

9. All of the following are correctly paired Six Healing Sounds EXCEPT:

- A. Xū 嘘 — Liver
- B. Hē 呵 — Heart
- C. Chuī 吹 — Spleen
- D. Xī 嘻 — Triple Burner

T/F each: A ___ B ___ C ___ D ___

10. All of the following are true about the general smell rule EXCEPT:

- A. Strong, foul, rotten, fetid, or stinking smell indicates Heat or Excess
- B. Absence of smell indicates Cold or Deficient
- C. A fishy smell generally leans Cold or Deficient
- D. A strong smell always indicates Cold or Deficient

T/F each: A ___ B ___ C ___ D ___

11. All of the following are among the Five (named) Odors on the slides EXCEPT:

- A. Rancid
- B. Scorched
- C. Sour
- D. Putrid

T/F each: A ___ B ___ C ___ D ___

12. All of the following are true of the Five (named) Odor slides EXCEPT:

- A. "Fragrant" is described as cloying and sickly sweet, not pleasant
- B. "Putrid" is compared to rotting meat or stagnant pond water
- C. "Rotten" is compared to a trash can/garbage truck
- D. Each odor slide explicitly states its paired Zang-Fu element

T/F each: A ___ B ___ C ___ D ___

13. All of the following Breath odor findings are correctly paired EXCEPT:

- A. Sour — retention of food, Accumulation Disorder
- B. Foul, pungent — Damp-Heat in Stomach and Spleen
- C. Rotten — Damp-Heat in Large Intestine
- D. Fishy — Heart fire pouring into Bladder

T/F each: A ___ B ___ C ___ D ___

14. All of the following are true of Sweat and Sputum odor EXCEPT:

- A. Strong-smelling sweat indicates Damp-Heat
- B. Putrid-smelling sweat indicates disease of the Lungs, Liver, or Kidneys
- C. Sputum without smell indicates Heat
- D. Fishy-smelling sputum indicates Lung-Heat

T/F each: A ___ B ___ C ___ D ___

15. All of the following Stool & Flatulence findings are correctly paired EXCEPT:

- A. Extremely stinky diarrhea with pus or blood — Damp-Heat in the Intestines
- B. Sour and foul with indigestion — Food stagnation
- C. Fishy odor with loose stools — Cold in Spleen/Stomach
- D. Slight or odorless flatulence with emotional stress — Toxic Heat in Large Intestines

T/F each: A ___ B ___ C ___ D ___

16. All of the following Urine findings are correctly paired EXCEPT:

- A. Frequent, urgent, painful, burning, turbid yellow, foul odor — Damp-Heat in Bladder
- B. Heavy smell of urea, scanty yellow — Heart fire pouring into Bladder
- C. Clear, frequent, odorless or slightly fishy — Kidney deficiency
- D. Odorless urinary incontinence — Liver Qi stagnation

T/F each: A ___ B ___ C ___ D ___

17. All of the following are true of Vaginal Discharge and Nose/Ear/Eye odors EXCEPT:

- A. Strong-smelling, leathery vaginal discharge — Damp-Heat
- B. Fishy vaginal discharge — Damp-Cold
- C. Foul, fishy odor from the ears with turbid pus — Damp-Heat in the ear
- D. Red, swollen eyes with foul fishy odor — Damp-Heat in the Spleen channel

T/F each: A ___ B ___ C ___ D ___

18. All of the following are true about Hū 呼 in this deck EXCEPT:

- A. It is the Wood-element voice sound meaning "Shout"
- B. It is also the Spleen Healing Sound
- C. It appears in two different tables with two different meanings
- D. It is the pinyin/hanzi given for the "Weeping" voice sound

T/F each: A ___ B ___ C ___ D ___

ANSWER KEY

#	Ans	Why
1	D	The slides assign only three organs to the voice — Lung (production), Kidney (volume), Spleen/Stomach (strength). Liver is not one of the three voice-governing organs on these slides.
2	D	Reluctance to talk indicates a Cold pattern or Lung-Qi deficiency, not Full/Heat.
3	D	Lung/Kidney Yin deficiency hoarseness is described as worse in the EVENING, not the morning.
4	D	A surplus of external contraction of evil qi (or phlegm-heat) is the Excess/Heat mechanism, not Empty/Cold. Empty/Cold is from internal damage causing insufficient Zheng Qi and Kidney/Lung Qi vacuity.
5	D	Shortness of Breath is attributed to Lung qi deficiency or Water Retention in the Chest, not excess Heart fire.
6	D	A quiet, low hiccup sound indicates an Empty pattern (often ST-Qi or ST-Yin deficiency), not Full/Excess.
7	D	Sighing generally indicates Qi stagnation of the Liver or Lungs (from repressed anger/frustration or worry/sadness), or Spleen/Heart deficiency from sadness/grief/pensiveness — not Kidney Yin deficiency.
8	C	Earth pairs with Singing, not Groaning. Groaning pairs with Water.
9	C	Chuī 吹 targets the Kidney, not the Spleen. The Spleen Healing Sound is Hū 呼.
10	D	A strong smell indicates Heat or Excess, the opposite of what this option states.
11	C	The five named odors on these slides are Rancid, Scorched, Fragrant, Rotten, and Putrid. "Sour" is not one of the five named odor slides (though it appears separately as a Breath odor finding).
12	D	Unlike the Five Element Sounds slides, the Five Odor slides do NOT explicitly pair each odor with an element.
13	D	Fishy breath odor indicates Phlegm-Heat in the Lung. Heart fire pouring into the Bladder is the pattern for a heavy urea smell in urine, not breath.
14	C	Sputum without smell indicates Cold, not Heat.
15	D	Slight or odorless flatulence aggravated by emotional stress indicates Liver qi stagnation. Toxic Heat in the Large Intestines is indicated by flatulence that smells rancid and rotten like rotten eggs.
16	D	Odorless urinary incontinence indicates exhaustion of Kidney fire, not Liver Qi stagnation.
17	D	Red, swollen eyes with turbid tears and foul, fishy odor (or ulcerations) indicates Damp-Heat in the LIVER channel, not the Spleen channel.
18	D	No pinyin/hanzi is given for the Weeping voice sound on these slides. Hū 呼 is the Shouting voice sound and the Spleen Healing Sound.
