

Week 6 Study Guide

Inspection (Observation) — Vitality, Color, Appearance, Five Sense Organs, Hair, Skin, Nails, Secretions, Pediatric Diagnosis

Lecture 6 · Daniel Schrier, D.O.M., L.Ac. · Guest Material: Lixing Lao, Ph.D., L.Ac., MB

How to use this guide: Read once for the framework (Zang-Xiang, Five Wheels, Five Colors), then drill the tables. Every enumerable finding-to-pattern mapping is in a table — memorize rows, not paragraphs. Pair with the Cram Sheet the night before class.

Scope Conflict — Read This: In his own recorded lecture, Prof. Schrier said Body Constitution typing would **NOT** be on the quiz. But his own slide deck for this week (*Diagnosis by Observation*) devotes roughly a fifth of its slides to Constitutional Types (Five-Element body types, weak/strong constitution) — his spoken statement and his own slides disagree with each other. Since slide content normally = quiz content almost verbatim, this guide includes the constitution material (Section 14) rather than omitting it — but you should confirm with him directly which one governs the quiz.

TCM for Ballroom Dancers

reMarkable Edition

1 • Framework: Zang-Xiang & the Four Diagnostic Methods

Inspection works because internal organ states manifest on the body surface (Zang-Xiang theory). Three classical citations anchor this idea — know the concept, not the exact wording.

Source	Core Idea
Huangdi Neijing (475–221 BCE)	Internal viscera must manifest themselves externally.
Zhu Danxi (1281–1358)	Observe external manifestations to know what is happening inside; internal organ disease shows on the body surface.
Zhang Jiebin (1562–1639)	Zang-fu organs sit interiorly but manifest exteriorly — hence the name <i>Zang Xiang</i> ("viscera-image").

Quick Recall: *Zang Xiang* = *what's inside shows on the outside*.

Method	What It Uses	Key Point
Inspection (Observation)	Eyes — vitality, color, appearance, secretions/excretions	Includes tongue diagnosis as a sub-category
Auscultation & Olfaction	Ears (listening) + nose (smelling)	Sound and odor of the patient
Inquiry	Verbal questioning	History and subjective symptoms
Palpation	Touch, incl. pulse diagnosis	Physical exam

Heads Up — The four methods are never used in isolation — over-relying on one and neglecting the other three is explicitly called out in the slides as a diagnostic pitfall.

2 • Observation of Vitality (Shen)

Shen is the outward sign of the relative strength of Qi and Blood of the zang-fu organs.

Presentation	Meaning
Eyes clear, sparkling; vigorous mental status	Healthy Shen present
Eyes dull, cloudy; lethargic mental status	Shen disturbed; essence of the five zang organs weakened

Quick Recall: *Clear + bright eyes* = *Shen present*. *Dull + cloudy* = *Shen disturbed*.

3 • Observation of Color — The Five Colors of the Face

Color and luster of the face (or any skin area). General rule: a lustrous, moist complexion = mild disease, good prognosis. A dark, haggard complexion = severe disease, poor prognosis.

Color	General Indication	Key Variants
Red	Heat (excess or deficient type)	Entire face red = excess-type yang heat (exogenous fever, or zang-fu yang hyperactivity). Malar (cheek) flush only = yin-deficiency heat, often w/ tidal fever & night sweats
Pale (White)	Cold, blood deficiency, yin excess, yang deficiency	Bright white + puffy/bloated = yang qi deficiency. Withered pale = blood deficiency
Yellow	Deficiency, damp syndromes	Whole-body yellow (incl. eyes/skin) = jaundice. Bright orange = yang jaundice (damp-heat). Smoky dark = yin jaundice (cold-damp or chronic blood stagnation). Pale yellow, no brightness = qi & blood deficiency
Blue (Green)	Cold, pain, blood stagnation, convulsion	Pale + blue tinge = excess yin/cold w/ severe epigastric/abdominal pain. Blue-purple face+lips w/ precordial pain = heart blood stagnation. Blue-purple w/ high fever + limb movement in children = infantile convulsion
Dark Grey (Black)	Kidney deficiency, blood stagnation	Pale-dark + lumbar soreness + cold feet = kidney yang insufficiency. Dark, no brightness, scaly skin = prolonged blood stagnation

Quick Recall: *Red=heat, Pale=cold/blood-def, Yellow=damp/deficiency, Blue-green=cold/pain/stasis, Black=kidney/stasis*.

Heads Up — Homework/likely quiz format: build a comparison table of the five colors with TCM term + case example — this is exactly the assignment given in lecture. Expect a similar matching or fill-in format on the quiz.

Secretions & Excretions — General Color Rule

Presentation	Meaning
Clear and white (nasal discharge, sputum, urine, vaginal discharge)	Deficiency and cold
Turbid and yellow	Excess and heat

4 · Observation of Appearance, Movement & Body Shape

Body Shape

Presentation	Pattern
Overweight + mental depression	Qi deficiency with excess phlegm-damp
Thin person, dry skin	Blood insufficiency
Great weight loss over a long illness	Exhaustion of essential Qi
Large, barrel chest / full epigastrium	Full (excess) condition of lung and stomach
Large, overweight thighs	Spleen not transforming/transporting
Thin body overall	Yin deficiency
Overweight body overall	Yang deficiency with phlegm

Movement & Posture

Presentation	Pattern
Active movement	Yang syndrome
Passive manner	Yin syndrome
Violent movement of the four limbs	Wind disease (e.g. tetanus, acute/chronic infantile convulsion)
Muscle weakness, motor impairment, muscular atrophy	Wei (痺) syndrome
Pain, soreness, heaviness, numbness in tendons/bones/muscles + joint swelling/restricted movement	Bi (痹) syndrome (painful obstruction)
Numbness + impaired movement on one side of the body	Hemiplegia / wind-stroke
Quick movement + feeling of heat	Excess Yang
Slow movement + feeling of cold	Yang deficiency
Small, restless fidgeting (e.g., leg bouncing)	Empty (deficiency) heat
Tremors, convulsions	Wind (involuntary movement)

Presentation	Pattern
Paralysis	Internal wind
Stiffness / rigidity	Qi stagnation, blood stasis, and/or internal wind

Quick Recall: Active/fast/hot = Yang excess. Passive/slow/cold = Yang deficiency (NOT Yin deficiency — Yin deficiency causes heat, not cold). Involuntary = wind.

5 · Five Sense Organs I: The Eyes & the Five Wheels

The Liver opens into the eye, but the essential Qi of ALL five zang and six fu organs pours upward into the eyes (*Ling Shu* 80) — so the eye as a whole reflects Liver, but sub-regions reflect other organs via the Five Wheels.

Five Wheels of the Eye — source: Maciocia, The Foundations of Chinese Medicine (3rd ed.), via Prof. Schrier's Week 6 slides. Used for internal class study only.

Wheel	Eye Structure	Organ	Mnemonic
Blood Wheel	Inner & outer canthus	Heart (canthus also relates to Small Intestine)	Blood → Heart
Qi Wheel	Sclera (whites of the eye)	Lung	White = Metal = Lung
Wind Wheel	Iris (colored part)	Liver	Wind = Liver's pathogenic factor
Water Wheel	Pupil	Kidney	Black = Water = Kidney
Flesh Wheel	Eyelids (upper = Spleen, lower = Stomach)	Spleen/Stomach	Flesh = Earth

Heads Up — Right Chi pulse position pairs with Pericardium/San Jiao, NOT Kidney directly — don't cross-confuse pulse-position organ pairing with this eye-wheel organ pairing; they are separate systems.

Liver & the Eye — Functions

Liver harmonizes and distinguishes color; Liver stores Blood, which nourishes the eyes to allow sight; Liver governs tears, which moisten the eyes (basal/reflex tears for lubrication & protection — NOT emotional tears).

Eye Color

Color	Indication
Bright yellow (tangerine-peel)	Damp-heat, heat predominant
Dull, dusky yellow	Damp-heat, damp predominant
Dull, dark yellow	Cold-damp
Deep yellow + bloodshot	Toxic heat in the blood level (reckless blood movement)
Dull, dark yellow-brown	Blood stasis (with dark rings under eyes, pain, purple tongue, wiry pulse)
Red (inner/outer canthus)	Heart fire (or Small Intestine, if outer canthus)
Red, entire eye + headache, easily angered	Rising Liver fire
Red sclera, sore throat, cough, breathlessness	Exterior wind-heat affecting the Lung
Sudden red + itching + aversion to cold	Exterior invasion of wind-heat
Blue-green	Liver wind (involuntary movement, tremor, dizziness, numbness, paralysis)

Color	Indication
Bluish	Internal cold (cold limbs, cold abdominal pain, tight/slow pulse) or Kidney Yin deficiency
Dark sclera (crab-eye black)	Accumulated heat
Dark eye sockets, sunken	Liver & Kidney Yin deficiency
White rings around iris	Turbid phlegm
Cloudy white iris	Liver & Kidney Yin deficiency
Pale white vessels in canthus	Blood or Yang deficiency

Quick Recall: Yellow=damp, Red=heat/fire, Blue-green=wind/cold, Black/dark=extreme heat OR extreme cold, White=deficiency/phlegm.

Eye Shape & Movement

Presentation	Pattern
Bulging / protruding eyeballs + anger, red tongue, yellow greasy coat	Liver Yang rising with heat and damp
Protruding + neck swelling, dizziness, tinnitus, five-center heat, red tongue, scant coat	Liver Yin deficiency with relative Yang excess
Sunken eyes + slight cough, weak voice	Lung deficiency
Sunken eyes + poor appetite, distention, limb weakness	Spleen deficiency (not transforming/transporting)
Sunken, sudden onset, deep/scattered pulse	Yin/Yang collapse (severe)
Swollen, sudden onset, no color change (edema)	Fluid metabolism malfunction (Spleen deficiency w/ damp)
Bags under the eyes	Spleen & Kidney deficiency
Strabismus / eye deviates, sudden onset, no redness/swelling	Wind attacking the channels
Deviation + nausea, vomiting, greasy coat, slippery pulse	Wind-damp-phlegm obstruction
Both eyes deviate up/high fever/convulsion/coma	Extreme heat generating wind

Presentation	Pattern
Deviation after trauma	Blood stasis
Congenital deviation (uni- or bilateral)	Essence deficiency (Kidney)
Frequent involuntary spasms, dry itchy eyes, pale face/lips, thready pulse	Blood deficiency
Eyelids heavy/tired feeling	Spleen Qi deficiency
Occasional spasm + red/painful/itchy + fever/chills, floating pulse	Exterior invasion (wind-heat)
Droopy eyelids (ptosis)	Qi sinking, or wind attacking the channels; after trauma = local stagnation/ weakness

6 · Five Sense Organs II: The Nose

Two valid organ associations: five-phase correspondence = Lung opens to nose; facial maps (both the *Su Wen* center-of-face map AND the *Ling Shu* bridge-of-nose map) = Spleen. Default study approach: think Lung + Spleen first, then read the other signs.

Finding	Pattern
Green/blue tip of nose	Cold
Yellow tip, yellow sputum, yellow coat	Damp (and heat, if thirst/sweating/feeling hot also present)
White / pale tip	Blood deficiency
Red tip	Heat
Gray tip	Impaired water movement → edema/fluid accumulation
Greenish bridge of nose	Liver Qi stagnation
Grayish-dark / dark purple bridge	Blood stasis (stabbing, boring pain)
Red bridge	Liver fire (irritability, outbursts of anger, red/bloodshot eyes, dryness)
Clear watery discharge	Cold pattern (exterior wind-cold)
Thick yellow discharge	Heat pattern

Finding	Pattern
Dry and black	Toxic heat
Flaring of the nostrils	Extreme heat
Epistaxis (nosebleed)	Excess heat attacking lung/stomach, pushing blood out of the vessels
Swollen nose	Excess condition
Sunken nose	Deficiency condition
Nasal polyps	Stagnated heat in the Yangming channel

Quick Recall: Normal nose = slightly moist and shiny. Too dry = heat. Too wet/oily = damp.

Edema Location — The Three Yin Organs

Edema starts in...	Organ Implicated
Upper body / head	Lung (governs water pathways)
Lower body / feet	Kidney (source of body fluids)
Four limbs / torso	Spleen (transforms/transport water)

Heads Up — San Jiao is also involved in fluid metabolism, but the three *yin organs* tested for edema location are Lung, Spleen, Kidney — know the origin-site logic, not just the organ name.

7 • Five Sense Organs III: The Ears

The Kidney opens to the ear (basis of auricular acupuncture as a body microsystem).

Finding	Pattern
Dry, withered auricle, burnt black, chronic/severe illness	Kidney essence consumed, cannot nourish upward
Purulent ear discharge ("Tin Er")	Damp-heat of Liver & Gallbladder
Swelling/pain in middle ear	Heat in the Shaoyang
Thin ear	Qi or Blood deficiency
Long, full earlobes	Strong constitution / good Kidney essence
Small earlobes	Poor constitution
White, pale ears	Cold
Darkish / bluish ears	Pain caused by cold
Dry, withered earlobes	Kidney Qi exhaustion (usually Kidney Yin)
Shiny, moist earlobes	Good prognosis (Kidney Yin intact)

Finding	Pattern
Dry, withered earlobes	Poor prognosis
Yellow/white pus discharge	Kidney Yin deficiency with fire, or Liver/Gallbladder damp-heat
Ear color: white	Sudden wind-cold invasion
Ear color: green/black	Pain
Ear color: black	Kidney failure
Ear color: red	Excess heat (possibly damp-heat)
Ear color: yellow	Damp accumulation

Tinnitus Pitch	Organ
High-pitched (like cicadas)	Liver
Low-pitched (like rushing water)	Kidney

Quick Recall: High-pitch tinnitus = Liver (cicada). Low-pitch = Kidney (water).

8 · Five Sense Organs IV: Teeth, Gums, Lips/Mouth, Throat

Teeth (Kidney — teeth are the "surplus of bone")

Finding	Pattern
White, moist sheen, bright/clean	Strong Kidney Qi
Dry, no sheen	Kidney Yin decline
Yellowing (gradual, with age)	Normal aging
Sudden dull yellow (like a soybean)	Kidney deficiency
Gray and black (like a black bean)	Exhaustion of Yin and Yang
Dry, black, gray	Kidney Yin deficiency
Tartar, grimy yellow	Stomach turbidity
Burnt and dry	Kidney & Stomach Yin deficiency
Delayed baby/adult teeth	Essence and Jing deficiency
Teeth growing at deviated angles / missing	Insufficient Yangming Qi (Stomach/LI wrap the mouth & gums, which are Flesh/Earth — not enough Earth Qi to hold teeth in place)

Finding	Pattern
Loss of teeth in adult, receding gums	Fire flaring upward from Kidney Yin deficiency

Gums (Spleen/Stomach — Flesh)

Finding	Pattern
Moist, deep red (normal)	Normal
Deep red + swelling	Excess heat / Stomach fire
Pale	Blood deficiency
Atrophied	Kidney deficiency
Blue line between teeth and gums	Mercury poisoning
Swollen, ulcerated, bleeding	Stomach fire pushing blood out of vessels

Lips & Mouth (Spleen opens to the mouth)

Finding	Pattern
Pale lips	Blood deficiency
Blue-purplish lips	Retention of cold OR blood stagnation
Bright red lips	Heat toxins
Crimson lips	Yin-deficiency heat
Dry, red lips	Heat damaging fluids
Purple lips	Blood stasis (stabbing pain)
Deviated mouth	Wind (deviation of face/mouth = wind; deviated tongue = wind too)
Mouth slightly open	Deficiency pattern
Mouth remains open + high fever, red face, thirst, canker sores	Excess heat
Breathing through open mouth	Empty/deficiency pattern

Finding	Pattern
Open mouth + SOB + cough + frothy sputum	Lung deficiency with phlegm stagnation
Sudden attack, open mouth, drooling, loss of consciousness	Wind

Throat & Tonsils (Stomach + Lung primarily)

Finding	Pattern
Deep red throat/pharynx	Heat
Pale red throat	Empty (deficiency) heat
Acute pain + redness + swelling	Wind invasion (acute = exterior)
Chronic redness/swelling	Interior organ heat (Stomach heat)
Chronic sore, dry throat, NOT swollen/red	Lung and/or Kidney Yin deficiency with empty heat
Erosion, redness, swelling, yellowish-red	Heat in Stomach/Intestines
Chronic erosion, comes and goes	Empty (deficiency) heat
Chronic erosion w/ hard raised-edge ulcers	Blood stasis with phlegm-heat
Swollen tonsils, normal color	Damp/phlegm retention on background of Qi deficiency
Chronically red/swollen tonsils	Heat or toxic heat in Stomach/Large Intestine

Finding	Pattern
Acutely red/swollen tonsils	Wind-heat invasion with heat toxicity
Acute red/swollen with exudate	Heat toxins in Stomach/LI (vs. cold)

9 • Hair, Nails & Skin

Hair (reflects Blood + Kidney Essence; "women ruled by Blood, men ruled by Qi")

Finding	Pattern
Original color, shiny, lustrous, moist	Sufficient Blood and Kidney essence
Premature graying	Depletion of Kidney essence
Dull, brittle, easily broken	Deficiency of Kidney essence (or Liver Blood deficiency)
Thick, lustrous	Sufficient Blood and Kidney essence
Thin, sparse	Deficiency of Kidney
Thinning / falling out (general)	Blood deficiency
Falling out in patches	Blood deficiency within the channels

Nails (reflect the Liver)

Finding	Pattern
Pink, normal luster	Sufficient Qi
Dark red	Heat
Pale	Blood deficiency or cold
Nail bed blanches white, returns to color immediately	Sufficient Qi and Blood
Nail bed returns to color slowly	Exhaustion of Qi and Blood
Withered, dried	Liver or Kidney Yin insufficiency; chronic Bi obstruction
Atrophied / peeled	Yin deficiency
Soft and thin	Deficiency of Blood
Rough, thick, dull, no transparency	Qi and Blood deficiency with wind
Longitudinal striping / blood loss appearance	Liver Blood deficiency, trauma, or fungal infection

Finding	Pattern
Brittle	Blood deficiency, wind, or trauma
Hook-shaped	Qi and Blood stagnation, or wind-painful obstruction
Spoon-shaped	Qi and Blood stagnation, malnutrition, Spleen deficiency, chronic Bi
Ridged	Kidney Yin deficiency, Liver Yang rising, or Blood deficiency
Bluish veins on thenar eminence (palm)	Cold in the Stomach (thenar eminence reflects Stomach, via Lung channel)
Short bluish veins, thenar	Empty (deficiency) pattern
Red veins, thenar	Heat
Purple veins, thenar	Blood stasis

Skin

Finding	Pattern
Lustrous, harmonious color (normal)	Normal
Red	Heat
Yellow, orangish	Damp-heat, more heat than damp
Yellow, dusky	Damp-heat, more damp than heat
Too moist	Lung not controlling fluids
Dry	Blood deficiency / fluid deficiency
Dark, with scales	Blood stasis
Itching	Wind
Pitting edema (upper body downward)	Yang edema – Spleen/Kidney Yang deficiency, fluid not mobilized
Non-pitting edema	Qi stagnation or dampness

Finding	Pattern
Edema starting from feet/lower body, worse below	Yin edema

Skin Lesions

Lesion	Description
Papule	Seed-sized rash, red, distinct raised borders, palpable; color fades with pressure
Macule	Flat red patch, clear edges, no swelling; color does NOT fade with pressure
Blister	Fluid-filled (clear or turbid), thick or thin walls
Nodule	Palpable, solid, round lesion

Term	Cause
Yong (癰) – carbuncle, Yang-type	Internal accumulation of fire toxins
Ju (瘰) – carbuncle, Yin-type	Insufficient Qi/Blood + internal stagnation of Qi, Yin, and cold
Ding (疔) – boil/furuncle	Exogenous wind-fire toxins, or accumulated heat toxins on the surface
Jie (癰) – furuncle	Stagnated Qi and Blood due to damp-heat in the skin

10 • Secretions & Excretions — General Logic

Quality	Reading
Color: white	Cold
Color: yellow	Heat
Consistency: thin, clear, watery	Deficiency / cold
Consistency: thick, sticky	Excess / heat
Quantity: profuse	Cold
Quantity: scanty	Deficiency / heat (heat dries fluids)
Odor: none/faint	Cold
Odor: strong	Heat
Form: with distinct form (e.g., hard dry stool)	Excess, tends toward heat
Form: formless / watery	Deficiency, tends toward cold

Quick Recall: White/thin/profuse/no-odor = cold-deficiency cluster. Yellow/thick/scanty/strong-odor = heat-excess cluster.

Heads Up — These four axes (color, consistency, quantity, odor) apply across nasal discharge, sputum, stool, and vaginal discharge alike — one framework, many tissues. Expect the quiz to test this transferable logic, not just one secretion type.

11 • Pediatric Diagnosis — Infant Finger Venous Diagnosis

Used for children under 3 years old (before the radial pulse is reliably palpable). Practitioner holds the child's hand with the left hand and rubs the index finger's radial-side vein toward the body (proximally) with the right thumb.

Side Examined	Sex
Left index finger	Boys
Right index finger	Girls

Gate the vein reaches	Severity
Wind Gate only (1st segment)	Mild illness / exterior pathogen
Qi Gate (2nd segment)	Interior condition, stronger illness
Life Gate (3rd segment)	Severe illness
Beyond Life Gate to fingertip	Life-threatening

Quick Recall: Wind → Qi → Life Gate = mild → stronger → severe → past the tip = life-threatening. Mnemonic: Wei-Qi-Ying-Xue four-level logic (Qi = interior stage).

Vein Color (after rubbing)	Indication
Light red, not very visible	Normal
Bright red	Heat
Purple	Stronger heat, creating stasis
Green or dark blue	Wind

Heads Up — This technique is infant-only (age <3) — it will not show reliably on adults. Don't confuse with the general adult nail-bed blanch test.

12 • Shen Vocabulary, the Su Wen 32 Face Map & Facial Variables

Prof. Schrier's slides add Chinese-term precision to Shen assessment and a second, distinct facial map from the one in Section 5's eye wheels — this one assigns heat disease to face regions.

Having Shen vs. Loss of Shen vs. False Shen

Observation	Having Shen (yǒu shén)	Loss of Shen (shī shén)	False Shen (jiǎ shén)
Complexion	Bright and moist	Dim, dull sheen	Dull, then suddenly lustrous
Eyes	Alert, vivid, twinkle	Dull, blurred vision	Dull, then suddenly bright
Mind/Speech	Clear speech, conscious, agile	Unconscious, delirious	Unclear, then sudden change
Motion/Response	Quick, appropriate	Sluggish and slow	Suddenly responsive
Respiration	Even	Rapid, feeble, or difficult	Feeble, then briefly steady

Heads Up — False Shen (also called a "flare before the flame goes out") is a critical-condition finding: a listless, unconscious patient with dull eyes suddenly appears clearer, brighter-eyed, and hungrier. This is a warning sign, not genuine recovery.

Manifestations of Deranged Shen (shén luàn)

Term	Presentation
Irritability & Restlessness (fán zào)	Hot/feverish sensation with irritability; can drive the patient to seek cold/water
Visceral Agitation (zàng zào)	Mental depression, hallucination, disorientation, crying spells, frequent yawning, no loss of consciousness
Lily Disease (bái hé bìng)	Chronic depression, apathy, aversion to speaking, mumbling to self, insomnia, anorexia, sleepwalking
Yin Madness (diān)	Chronic depression, aversion to speaking or mumbling, laughing/crying inappropriately
Yang Madness (kuáng)	Raving, obscenities, restlessness, singing loudly in public, wandering naked, aggression

Su Wen 32 — Heat Disease Face Map

Distinct from the Section 5 Five Wheels (which map eye sub-structures). This map assigns organ heat disease to broad face regions — classic homework/quiz material per both decks.

Drawn as if facing the patient — their left cheek is on YOUR right.

Su Wen 32 face map (Maciocia Fig. 23.1), via Prof. Lao's Week 6 slides. Used for internal class study only.

Heads Up — Left/right below means the **patient's own** left and right, not yours as the viewer. Any face-forward diagram (including the professor's slide) is mirrored: standing face-to-face with the patient, their left cheek is on YOUR right. Don't let a picture's left/right visually contradict this table — they agree once you remember whose left it is.

Face Region (patient's own left/right)	Organ Heat Disease
Left cheek (patient's)	Liver
Forehead	Heart
Nose	Spleen
Right cheek (patient's)	Lung
Chin	Kidney

Quick Recall: Su Wen 32 (patient's own left/right): L cheek=Liver, Forehead=Heart, Nose=Spleen, R cheek=Lung, Chin=Kidney.

Facial Diagnosis Variables

Variable	Definition
Original/Host Color (bǎn miàn sè)	The person's baseline facial color, fixed and unchanged throughout life
Guest/Visitor Color	Slight, temporary facial color shifts following seasonal and climatic change
Normal Variables	Temporary color changes due to environment, light, emotion, activity, etc.

Attribute	Reflects	Associated With
Facial Color	Color of the skin	Blood and Yin
Facial Sheen	Luster/moisture of the skin ("contained" color)	Qi and Yang

Quick Recall: Normal complexion = a subtle, slightly reddish hue with a gentle sheen — color from Blood/Yin, sheen from Qi/Yang.

13 · Excreta & Secretions — Quiz-Yourself Framework

Prof. Schrier's deck presents this exact framework as a self-test slide (fill-in-the-blank) — treat this table as near-verbatim quiz material.

Axis	Value	Reading
Color	White	Cold
Color	Yellow	Heat
Quantity	Scanty	Deficiency / heat (dries fluids)
Quantity	Profuse	Cold
Quality	Formed	Excess
Quality	Formless	Deficiency
Quality	Thick	Excess / heat
Quality	Thin	Deficiency / cold
Odor	No odor	Cold
Odor	Strong odor	Heat

Heads Up — This is the same logic as Section 10, restructured exactly the way Prof. Schrier's slide poses it (fill-in-the-blank). If the quiz uses a fill-in format, expect it to look like this table.

14 · Constitutional Types (Flagged — See Scope Conflict on Cover)

Heads Up — Included because Prof. Schrier's own deck devotes ~9 of 41 slides to this topic, despite his own recorded lecture statement that constitutions would not be tested. Confirm scope with him before deciding how hard to study this section.

Weak vs. Strong Constitution (Ling Shu 54)

Constitutional Marker	Weak Constitution	Strong Constitution
Eyes/nose/ears/mouth	Close together	Well-proportioned
Space between eyebrows	Small	Broad forehead and glabella
Nose	Narrow, nostrils turned up/flared	Straight and made from a nice mold
Philtrum	Short	Long
Cheeks	Thin	Full, with normal complexion/luster
Jaw	Flat, sunken, low, narrow	Strong lower jaw, even and smooth
Ears	Small, short earlobes	Long ears with long earlobes
Muscles/skin	Flabby, loose	Firm

Quick Recall: Small, close-together features = weak constitution. Broad, long, well-proportioned features = strong constitution.

Cause of Weak Constitution
Parents' general health
Health at time of conception
Mother's health during pregnancy
Parental age and pregnancy events (emotional stress, trauma, drugs/medications/alcohol/smoking)

Heads Up — Constitution is not fixed: Pre-Heavenly (Jing) essence is the basis, but Post-Heavenly Qi (diet, lifestyle, herbs, acupuncture, breathing/physical practice — yang sheng) can improve it over a lifetime.

Five-Element Body Types (Ling Shu 64, per Maciocia)

Element	Physical Appearance	Personality
Wood	Greenish complexion, small head, long face, broad shoulders, straight back, sinewy body, tall	Superior talent, uses more mind than body, compensates for grief through hard work, survives sickness
Fire	Red complexion, small head, well-developed shoulders/back/buttocks/abdomen, small hands/feet, curly or little hair, walks fast and sways	Frivolous with wealth, little accountability, good-looking and passionate, quick decisions, tendency to violent death, very curious
Earth	Yellowish complexion, round face, big head, wide jaws, large abdomen, strong thighs/calves, walks without lifting feet	Dignified, content, calm in peace and quiet, unassertive, likes helping people, dislikes power/violence, very modest
Metal	Pale complexion, square face, small head/shoulders, flat abdomen, strong voice, walks slowly and deliberately	Keen thinker, honest, upright, quiet, calm, rational, aptitude for leadership
Water	Dark complexion, big head, wrinkles, round face and body, broad cheeks, large abdomen, long spine, swaying gait	Laid back, unafraid, tendency to deceive/betray others, prone to violent death, active always moving

Quick Recall: Wood=tall/sinewy/hardworking. Fire=curly hair/passionate/impulsive. Earth=round/big-head/calm-helper. Metal=square-face/honest/leader. Water=dark/wrinkled/deceptive.

15 · Dance Medicine Application

Dance Medicine Case — A 27-year-old competitive American Rhythm dancer (Cha Cha/Bolero) presents with a malar (cheek) flush that appears only after long rehearsal blocks, tidal warmth in the afternoons, and night sweats after competition weekends. Nails show longitudinal ridging. Applying this week’s framework: malar flush + tidal fever + night sweats → Yin-deficiency heat pattern (Section 3). Ridged nails → corroborate Kidney Yin deficiency or Liver Yang rising (Section 9). The pairing across two independent inspection findings (face color + nail texture) is exactly the kind of cross-validation the four diagnostic methods are built to encourage — one finding alone is a clue; two independent findings pointing the same direction is a pattern.

Quiz Scope Reminder

Section 14 (Constitutional Types) is optional learning. Prof. Schrier said in his own recorded lecture that constitutions would not be tested.
